Arindy, *The Influence of Team Teaching on Learning Results Web Programming Students Class X TKJ SMK Malaka Jakarta*. Essay. Jakarta, Electronics engineering education courses, State University of Jakarta, 2017. Supervisor: Dr. Moch. Sukardjo, M.Pd. And Aodah Diamah ST, M.Eng.

The purpose of this research is to know the influence of the implementation of team teaching on the subject matter of the text format of the web page to the learning result of the students of class X TKJ 1 SMK Malaka Jakarta.

The research is an experimental pre experiment with one-group pre-test post-test design. The sample was taken randomly as many as 30 students. The treatment given to students is that students are taught using Teaching Teaching Method (Teaching Teams). Before being treated, students are given a pre-test to determine the students' initial ability, then after being given the students treatment is given a post-test to find out how far the improvement of student learning outcomes. Instrument data collection in the form of test, in this test the questions are given in the form of multiple choice.

From the results of data analysis on the hypothesis test obtained price of t_{count} is 25,15 and t_{table} for one party is 2.462, when compared between t_{count} and t_{table}, then t_{count}> t_{table} or 25,15> 2,462.

The conclusion that can be taken is there is an positive influence on the learning outcomes of students who are taught using teaching team teaching methods, especially for the subject matter of text format web pages.
