

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter gives review from what derived on the discussion section based on the research question. For further research, the writer gives suggestion that can be use by other researcher.

5.1. Conclusion

Based on the research question, it shows that in order paraphrasing, students mostly used strategy to transform a word into is synonym. However, the research shows that while transforming the synonym, students still placing inappropriate synonym. In relation to the fulfillment of good paraphrase standards, the analyses showed that almost all paraphrases already fulfill the standard of good paraphrase with the percentage 75%.

5.2. Suggestion

Due to the limitation of time while conducting this research, the writer suggests to manage the effectiveness of time to obtain the source of data since the data should be *skripsi* and original sources that student used to form paraphrase. The writer also suggests the next researcher to use additional source like thesaurus to check the synonym while analyzing the data, and last, the researcher suggests involving the students which the *skripsi* is used to be analyzed.
