

## ABSTRAK

**SYAFIRA HASNA, HUBUNGAN ANTARA PENGALAMAN PRAKTIK KERJA INDUSTRI DAN HASIL UJI KOMPETENSI TERHADAP KESADARAN BERKARIR KELAS XII TITL DI SMK DINAMIKA PEMBANGUNAN 1 AJARAN 2017/2018.** Skripsi. Jakarta:Program Studi S1 Pendidikan Teknik Elektro Fakultas Teknik Universitas Negeri Jakarta, 2019. Dosen Pembimbing: Drs.Faried Wajdi, M.Pd., MM dan Drs.Irzan Zakir, M.Pd

Penelitian ini bertujuan untuk mengetahui, 1) Hubungan antara pengalaman praktik kerja industri dengan kesadaran berkarir siswa kelas XII TITL di SMK Dinamika Pembangunan 1 Ajaran 2017/2018, 2) Hubungan antara hasil uji kompetensi dengan kesadaran berkarir siswa kelas XII TITL di SMK Dinamika Pembangunan 1 Ajaran 2017/2018 dan 3) Hubungan pengalaman praktik kerja industri dan hasil uji kompetensi dengan kesadaran berkarir siswa kelas XII TITL di SMK Dinamika Pembangunan 1 Ajaran 2017/2018. Pengalaman praktik kerja industri merupakan pengalaman yang didapat siswa selama mengikuti kegiatan praktik kerja industri. Untuk hasil uji kompetensi merupakan nilai yang didapat siswa sebagai evaluasi siswa selama mengikuti pembelajaran produktif di sekolah. Kedua variabel tersebut diharapkan dapat menunjang kesadaran berkarir siswa kelas XII, sehingga memiliki perencanaan karir dan dapat memutuskan pilihan karirnya.

Pada penelitian ini menggunakan pendekatan kuantitatif dengan metode *ex-post facto*. Populasi dalam penelitian ini adalah siswa kelas XII TITL SMK Dinamik Pembangunan 1 Tahun Ajaran 2017/2018. Sedangkan sampel dari penelitian ini adalah siswa kelas XII TITL SMK Dinamika Pembangunan 1 Tahun Ajaran 2017/2018 sebanyak 75 orang. Teknik analisis data yang digunakan adalah uji t dan uji f, yang sebelumnya dilakukan uji prasyarat analisis menggunakan uji normalitas dan uji lineritas. Uji t dan uji f dilakukan untuk mendapatkan uji hipotesis penelitian.

Hasil penelitian menunjukkan bahwa terdapat, 1) Hubungan antara pengalaman praktik kerja industri dengan kesadaran berkarir dengan koefisien korelasi sebesar  $\hat{Y} = 11,77 + 0,902X_1$ , 2) Hubungan hasil uji kompetensi dengan kesadaran berkarir dengan koefisien korelasi sebesar  $\hat{Y} = -118,28 + 2,51X_2$ , 3) Hubungan pengalaman praktik kerja industri dan hasil uji kompetensi dengan kesadaran berkarir dengan koefisien korelasi sebesar  $\hat{Y} = -41,14 + 0,626X_1 + 0,916X_2$ . Dari pemaparan hasil penelitian tersebut, maka dapat disimpulkan terdapat hubungan antara pengalaman praktik kerja industri dan hasil uji kompetensi dengan kesadaran berkarir baik secara individu maupun secara bersama-sama.

*Kata Kunci: Pengalaman Praktik Kerja Industri, Hasil Uji Kompetensi, Kesadaran Berkarir*

## ABSTRACT

**Syafira Hasna, The Relationship Between Industrial Work Experience And The Results Of Competence Tests 12th Grade TITL In Dinamika Pembangunan 1 Vocational High School Academic Year 2017/2018.**  
Supervisor: Drs.Faried Wajdi, M.Pd., MM and Drs.Irzan Zakir, M.Pd

This research to know, 1) Relationship between industrial work experience and career awareness of 12th grade TITL students at Dinamika Pembangunan 1 Vocational High School academic year 2017/2018, 2) Relationship between results of competency test and career awareness of 12th grade TITL students at Dinamika Pembangunan 1 Vocational High School academic year 2017/2018 and 3) Relationship of industrial work experience and results of competency tests with career awareness of 12th grade TITL students at Dinamika Pembangunan 1 Vocational High School Academic Year 2017/2018. The industrial work experience is the experience gained by students while participating in industrial work practices. For the results of the competency test is the value students get as an evaluation of students while following productive learning in school. Both of these variables are expected to support the career awareness of 12th grade students, so that they have career planning and can decide their career choices.

In this research using a quantitative approach with ex-post facto method. The population in this study were students of 12th grade TITL students at Dinamika Pembangunan 1 Vocational High School academic year 2017/2018. While the samples from this study were students of 12th grade TITL students at Dinamika Pembangunan 1 Vocational High School academic year 2017/2018 as many as 75 people. The data analysis technique used is the T test and F test, which previously carried out analysis prerequisite tests using the normality test and linearity test. The T test and F test are carried out to get the research hypothesis test.

The results showed that there were, 1) the relationship between industrial work experience with career awareness with a correlation coefficient of  $\hat{Y} = 11.77 + 0.902X_1$ , 2) Relationship between results of competency test and career awareness with a correlation coefficient of  $\hat{Y} = -118.28 + 2.51X_2$ , 3) Relationship between industrial work experience and results of competency test with career awareness with a correlation coefficient of  $\hat{Y} = -41.14 + 0.626X_1 + 0.916X_2$ . From the results of the research, it can be concluded that there is a relationship between industrial work experience and the results of competency tests with career awareness both individually and jointly.

Keywords: Industrial Work Experience, Results of Competency Test, Career Awareness
