Date : Wednesday, January 18th, 2018
Time : 14.00-16.00
Venue : Mayofield, Cilegon.
Purpose : Validating the proposed syllabus with the Industrial Engineering
Experts

Results

1. The students of Industrial Engineering need alot of exposure to the kinds of text and the process /procedure in doing the job responsibilities.
2. In the activities of sessions 4,5 & 12 it may be add watching videos related to the materials focused on,So the students can see the example of expressions clearly.
3. Read and identify the documents again to find more materials needed for learning related to industrial engineering at iron and steel industry.
4. If possible add the materials, such as : writing an email, telling daily activities, making planning, complaining ,giving a suggestion,giving announcement, etc.
