ABSTRACT

Improving First Reading Skills To Light Mentally Retard Educative Participant In 4Th Grade using Small Ball Media A Research in class of SLB Kembar Karya Pembangunan I Jakarta. Thesis. Jakarta : Special Education Jakarta State University 2015. The aim of the study is to improve first reading skills for light mentally retarded educative participant at 4Th grade of SLB Kembar Karya Pembangunan I Jakarta by using Small Ball Media which was implemented in July – December 2015. The method used was a class action research which conducted through two cycles. Standards of student success in mastering the material was 65 % of improvement, from the data analysis obtained percentage of first achievement about 23% after doing act in the first cycle percentage up to 49,5 %. Due to the percentage has not reached the standard of student success in mastering the material, the researcher conducted the action in the second cycle with percentage of 70% The percentage result in the second cycle showed a success. Thus can be said that the small ball media can improve first reading skills to light mentally retard student in 4Th grade.
