

PENINGKATAN MOTIVASI BELAJAR KATA (JURUS) MELALUI PEMBELAJARAN MASTERY

(Studi Penelitian Tindakan Pada Mahasiswa Pendidikan Kepelatihan Olahraga Kelas A Reguler FIK Universitas Negeri Medan
Tahun 2014)

Ratna Dewi

ABSTRAK

Tujuan dari penelitian ini adalah untuk mencari jawaban atas pengaruh langsung atau tidak langsung antara regulasi, sumber daya manusia, kualitas latihan dan fasilitas terhadap prestasi olahraga wushu. Penelitian ini dilakukan di tempat Pemusatan Latihan Nasional (PELATNAS) di Jakarta dan Medan. Adapun jumlah populasi sebanyak 24 atlet wushu. Pengambilan sampel menggunakan teknik *purposive sampling* sehingga diperoleh sampel berjumlah 14 atlet.

Penelitian ini menggunakan *path analysis* untuk menganalisis data penelitian yang diperoleh. Penelitian ini dimulai dengan menguji persyaratan analisis yaitu tes normalitas, homogenitas, linearitas dan signifikansi. Dan diakhiri dengan mencari koefisien jalur dan koefisien determinan dari masing-masing model yang diajukan.

Kesimpulan dari penelitian ini adalah: 1) Regulasi berpengaruh langsung terhadap prestasi olahraga, 2) Kualitas Latihan berpengaruh langsung terhadap prestasi olahraga, 3) Fasilitas berpengaruh langsung terhadap prestasi olahraga, 4). Regulasi berpengaruh langsung terhadap fasilitas, 5) Sumber Daya Manusia berpengaruh langsung terhadap fasilitas, 6) Kualitas Latihan berpengaruh langsung terhadap fasilitas, 7) Regulasi berpengaruh tidak langsung terhadap prestasi olahraga melalui fasilitas, 8) Kualitas Latihan berpengaruh tidak langsung terhadap prestasi olahraga melalui fasilitas

THE ACHIEVEMENTS SPORT WUSHU INDONESIAN

(Survey Study The Effect Regulation, Human Resources, Training Quality, and Facility Athletes Wushu Indonesian)

Ratna Dewi

Abstract

The purpose of this research is to obtain information on directly or indirectly effect of regulation, human resources, training quality and facility on achievements sport wushu Indonesian. This research was conducted at base camp of national training of wushu Indonesian at Jakarta and Medan. The population amounts are 24 national athletes wushu. The sample was taken used purposive sampling technique. The samples of this research are 14 National Athletes Wushu Indonesian.

This research was used path analysis to analyze data, which is started with normality, homogeneity of variance, linearity and significance test of each variable. And finished with find standardized coefficients of Beta and coefficient determinant.

The result showed that: 1) Regulation has significant direct effect to achievement in sport by 5,6%, 2) Training Quality has significant direct effect to achievement in sport by 8,2%, 3) Facility has significant direct effect to achievement in sport by 7,9%, 4) regulation has significant direct effect to facility in sport by 27%, 5) Human Resource has significant direct effect to facility in sport by 53%, 6) Training Quality has significant direct effect to facility in sport by 17%, 7) The indirect effect of Regulation to achievement in sport through facility is 38,3%, 8) The indirect effect of training quality to achievement in sport through facility is 40,3%.

Keywords : Regulation, Human Resources, Training Quality, Facility, Achievement in Sport, Wushu.
