## **ABSTRACT**

*This innovative research aims to stimulate the ability to speak children aged 4-5 years by using Media Puzzle book. Research on this innovative work uses the development model ADDIE (Analyys, design, Development, Impication, and Evalution). The results of this study involved material experts, media experts and users (children) to assess the feasibility of media puzzle book. The results of the test by the media experts received an average result of a 3.7 rating which in the category of assessment, including very decent. The results of the trial by the material experts received an average result of a 3.1 rating which in the category of valuation is included. The results of a trial by a paired child at TK TPA Al Quran Al Ikhlas have a 76% value included in the eligible category. Therefore, the media Puzzle book is well worth using to stimulate the ability to speak children aged 4-5 years.*

*Keyword : Media Puzzle Book, stimulate the ability to speak children aged 4-5 years.*
