

ABSTRACT

AHMAD FAUZI FAHRI. EFFECT OF INTERPERSONAL SKILL OUTBOUND STUDENT SMP PGRI RAWARENGAS TANGERANG. Essay. Jakarta: Recreation Sports Studies Program, Department of Sports Recreation, Faculty of Sport Science, State University of Jakarta, in January 2016.

This study was conducted to determine the effect on the activities of outbound students interpersonal skills SMP PGRI Rawarengas Tangerang. This research was conducted for 3 months (November 2015 - January 2016) using pre-experimental research by performing a one-group pre-test and post-test design. The instrument of this study using a questionnaire with Likert scale stuffing, the type of questionnaire used is a closed questionnaire, giving a score or value to each answer favorable and unfavorable. The statistical techniques used are Test T.

The result showed that the total score obtained by the student before getting treatment by 3405 while after receiving treatment equal to 3795. The average score obtained before getting treatment at 113.50 after receiving treatment at 126.50 game. So the initial test and final test increased 390 and the average score increased to 13.

Data initial test and final test students' interpersonal skills were analyzed using test T. From the analysis of the data obtained t_{count} value of 9.187. Further tested by t_{table} at the level of $\alpha = 0.05$ and a degree of freedom $n-1 = 30-1 = 29$, the value of t_{table} of 2,045, thus the value of $t_{count} \geq$ value of t_{table} or $9.187 \geq 2.045$. With the proven value of $t_{count} \geq$ value of t_{table} can be stated that the outbound activity can affect students' interpersonal skills SMP PGRI Rawarengas Tangerang.
