ABSTRACT

This research aims to determine the description of multicultural personality based on leadership style in students at State University of Jakarta. The population of this research are undergraduate students of education who follow the student organization executive period 2017-2018. This research used survey method with 165 samples determined based on proportional random sampling technique. The data were collected using two questionnaires, namely the multicultural personality questionnaire (MPQ) and the Ronald Lippit theory-based for measure of leadership style. The validity test result from both questionnaires was consulted with r_{table} of 0.291, while for the reliability test on the questionnaire of multicultural personality obtained value 0.922 and for the leadership style questionnaire obtained the value of 0.937 which means the two questionnaires are reliabel with very strong category. The results show that respondents tend to have a democratic leadership style (49%), then overall, the respondents are in the medium category (72%) of multicultural personality variables, and the highest percentage of multicultural personality is in the moderate category in leadership style.
