ABSTRACT

This study aims to determine the relationship between locus of control and teacher's job performance of Junior High School in Kecamatan Cimanggis Depok City. The method used is descriptive in the form of a survey. Samples were taken by using proportional random sampling technique. Based on this technique, the sample size used in this study were 82 teachers from 103 teachers with Pegawai Negeri Sipil title. Data collection for locus of control (X) and job performance (Y) using a questionnaire. Data analysis techniques are used to prerequisite first tested the normality test, significance test and regression linearity. From the result of hypothesis testing to test the significance of the correlation is obtained that $t_{count} > t_{table}$ as well as $t_{count} = 7,77$ and $t_{table} = 1,66$. Thus it can be said that the hypotesis can be accepted. This means that the null hypothesis (H0) is rejected. The result of this study can be concluded that there is a positive relationship between locus of ocntrol with teacher's job performance of Junior High School in Kecamatan Cimanggis Depok City.
