

ACKNOWLEDGEMENT

Alhamdulillah rabbil'alamiin, all praises to Allah Subhannahu Wa Ta'ala, The Most Gracious, The Most Merciful. I could never have done this without You, The Almighty.

This thesis would not have been possible without the support, participation, and assistance of a number of individuals as follows: Bapak and Ibu, I owe my deepest gratitude to both of them. To my beloved, supportive, patient, and super wife, Niken Akhirini, and my super funny son, Raushan Khalifa Sathrya, you are my precious ones. Without their unparalleled love, enthusiasm, encouragement, prayers, support, and continuous optimism, this thesis would hardly have been completed. I would also like to express my deepest appreciation to Bapak Endi Djunaedi and Ibu Pudjiastuti for their encouragement, support, and prayers.

I express my warmest gratitude to my advisors, Dr. Ifan Iskandar, M.Hum. and Dr. Ratna Dewanti, M.Pd. for their guidance, support and encouragement. To my friends in the EPG research team: Neni Nurkhamidah, Widia Purnamasari, Ersha Novita Widyasari, and Nabiilah Ramadhan, you are awesome! To all of my classmates, thank you very much.

May Allah Subhannahu Wa Ta'ala always bless us all.
