Human needs nowadays has increased and are more diverse because era advancement arises various choices of material and nonmaterial daily needs goods. The importance of finance management in human life, especially in family is not only about the amount of money which is possessed, but also how to utilize the money for family successfulness. This research aimed to describe family finance management of “manusia gerobak (cart man)”. The method used in this research was descriptive with qualitative approach. This research was conducted in the region of Manggarai, South Jakarta. The informants were selected by accidental sampling method and they were five family heads of “manusia gerobak” who lived inside the cart and already had a family. Primary and secondary data were collected in this research. The data were collected by observation, interview, literature and documentation study. Primary data were obtained from interview which consisted of 32 questions developing into more questions following the way the interview went and also based on the behavior of the informants and their surroundings. The data were analyzed with data reduction, data display and verification procedure. Data validity was then checked by triangular check, recheck and cross check technique. The result showed that families of “manusia gerobak” were able to manage their income well although the amount was inconsistent and limited. This condition made them to do more efforts to be able to fulfil their household needs.*
