

ACKNOWLEDGEMENT

All the praises and thanks be to Allah who has been blessing me with health and spirit to accomplish this thesis. This study has been completed with the help and support of many persons. Therefore, I am grateful to all of them.

First and foremost, I would like to express my sincerest honor and gratitude to my advisors: Dr. Darmahusni, M.A., as the first advisor and Dr. Muchlas Suseno, M.Pd. as the second advisor who shaped me on the path toward being an independent researcher. Thank you for the guidance, motivation, advices, suggestions, and support during the time I was conducting the research. Working with them, I have learned a lot of valuable knowledge and experiences in doing research. I would also like to thank all lecturers of State University of Jakarta who have shared their knowledge and experience. To all administration staffs, especially Mas Yusuf also for providing the kind help in administration matter.

My sincere gratitude is also addressed to the Principal of SMA Islam Al Azhar 8 Bekasi, Bpk. Drs. H. Yayat Suyatna, M.M. and the Vice Principal, Bpk. Rizal Pahlevi, S.S., who always understand and support my study for these two years by giving me an opportunity to continue my study while teaching at school. Next, I would like to send my deep gratitude to Ms. Lia, the English teacher and all students of Class XI Science 1 at SMA Islam Al Azhar 8 Bekasi, who have contributed to this successful study.

I would like to send my special thanks to Aji Ramdhani, M.Pd for the sharing and assistance for being the third expert in panel judgement of the

questionnaire. Many thanks are also sent to Rizky Amaliasari, S.Pd as “the third advisor” for me. Besides, my deep gratitude is also sent to my dear friends in PMPBI, especially Cipta, McLean, and Gesta for fighting together in catching up the deadline of thesis accomplishment. I would like to thank Bu Mandha, the librarian of SMA Islam Al Azhar 8 Bekasi who supported this study with technical aids. I also acknowledge Bu Fatimah, the Math teacher at the school, who assisted me in interpreting statistical data. My thanks are due to my beloved students in English Club, namely Alif, Alvin, and Bagas, who involved and gave some critics in this study.

Grateful thanks to my beloved family, especially my mother who gives me unconditional love, care, understanding and never-ending pray; and my son, Tangguh who always understands me and cheers me up, without you I am lonely. Besides, this thesis is specially dedicated to my late father who initially gave me life lessons and mental support to be brave to continue my study for master degree. Without you I am nothing.

Finally, I also thank to all people who have helped me accomplishing this thesis. I realize that this thesis is far from being perfect. Hopefully this thesis can give contribution to the development of English language teaching and learning.
