

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter aimed at providing the conclusion and suggestion. In this chapter, the writer concluded the research and suggested another possible research which related to the topic of the study.

#### 5.1 Conclusion

The analysis that has been done on discussionshows about homosexual relationship representation. The purpose of the study is torepresentation of homosexual, focusing on gay relationship in fanfiction *Out of My System*. After completing the several steps relating to the data collecting procedures, the data of the study that found are78narrations and dialogues that contain sexual identity that represents gay relationship. The analysis is based on four components of sexual identity, biological sex, gender identity, social sex-role, and sexual orientation. The study found no elements of gender identity. From the biological sex, it can be seen that Yoongi and Jimin's biological sex are defined as men. It also shows that Jimin is having a well-built body with nice abs. Also; it shows Yoongi likes men with good body or abs. That can be a reason why Yoongi likes Jimin, because Jimin has a nice body. The social sex-role tells more about the personality of Yoongiand Jimin. It shows that despite their social sex-role as men, Yoongi and Jimin act different. It

shows that Yoongi is described more masculine and Jimin is described more feminine. It is different from how society views how men should act because Jimin shows some feminine traits on him. Yoongi and Jimin sexual orientation is homosexual. It can be seen by the facts listed that by both physical appearance and affectional appearance on the sexual orientation components they both prefer having men as their partners. Yoongi likes men with abs and Jimin thinks a strong man that can carry him to bed is great.

From the study it can be concluded that the fanfiction represents gay relationship as something that is deviant. In addition, the writer also concluded that the gay representation in the fanfiction *Out of My System* is that gay couples have individuals with masculine and partner role as a feminine role. The role is not merely defined by physical appearance. It is defined based on the behavior and personality traits. Yoongi's role is the masculine one because it can be seen by the social sex-role categories that he is more masculine than Jimin that gets the feminine role because he is softer and acts cute. In addition, gay couples experience social discrimination from the public view as deviant behavior. They also face the negative responses from their family because their family sees them as an abnormal relationship.

## **5.2 Suggestion**

This research uses components of sexual identity theory to see the existence of homosexual representation in the fanfiction *Out of My System*. Using this theory in

reviewing the fanfiction makes it only focus on the sexual identity of homosexuality that are told in the fanfiction. The results in this study only related to the homosexual representation shown in the fanfiction *Out of My System*, limited to the gay representation. The writer suggests for students who are interested to analyze about homosexual representation can use another supporting theory about homosexuality with other fanfiction. It is also excellent to analyze another *fandom* (pairing) or even the W/W (woman/woman) fanfictions to see how fanfiction represents lesbian.
