**ARIESTA RAHMAWATI. Effectiveness of Technical and Tactical Approach to Learning Outcomes Under Mini Ball Volleyball In Grade V Students of SD NegeriCipinangBesar Selatan 08 Morning:** Physical Education Program, Department of Sport Education, Faculty of Sport Science, Jakarta State University, June 2017.

This study aims to improve the service learning outcomes under the mini volleyball to students of grade V SD NegeriCipinangBesar Selatan 08 Pagi. The research was conducted on March 09 to May 24, 2017. The measured indicators were: Early Attitude, Perenaan, Final Attitude, and Results obtained.

Based on the results of the research from the results of the initial test and the final test of two approaches is the approach of engineering and tactical approach to the learning outcomes under the mini volleyball in the students of class V SD NegeriCipinangBesar Selatan 08 that there has been an increase but the difference between them is not too significant, This was proven on the preliminary statistical test results of the average engineering approach of 27.6 and the final test of 32.08 whereas for statistical results the initial tactical test approach was 26.8 and the final test was 35.4. However, from the two approaches the tactical approach is more effective than the technical approach to service learning outcomes under mini volleyball in grade V students of SD NegeriCipinangBesar Selatan 08 Pagi with 2.48 for tactical approach and 2.07 for engineering approach.
