**ABSTRACT**

*This study aims to determine the extent to which the effectiveness of the training program make aromatherapy candles in PKBM 03 Cilincing, Tanjung Priok North Jakarta. This study uses survey, questionnaire as the main data collection, where learners are mostly mothers who live in the area PKBM 03. The population in this study of 20 people and the sample used is the whole of the population. This instrument has been tested previously by the validity and reliability, to determine the validity of the data.*

*The results of this study indicate that training makes aromatherapy candles in PKBM 03 Cilincing have a level of effectiveness that can be seen from the results of the percentage that has been made, namely the planning indicator consisting of quality, quantity, timing and delivery of training to obtain the level of effectiveness a total of 84.66 (effective) because it is in the range of 76-100 and seen from the results of the training to obtain the level of effectiveness 86.30 (effective) because it is in the range of 76-100. Thus the implementation of training make aromatherapy candles at PKBM 03 Cilincing is effective.*

*Test the validity of the instruments used in this study is the validity of the content and then pooled analysis technique and decomposition percentage poll result. Test results obtained instruments validity  $r_1 = 0.488$  with  $r_{table} 0.444$  so for the first item said to be valid. Besides testing the reliability of the instrument with alpha formula and obtain  $r_{count} = 1$  with  $r_{table} 0.444$ , because  $r_{count} > r_{table}$  then said to be reliable.*

*The conclusion that can be drawn from this study that the process of training activities in accordance with the purpose of training activities aromatherapy candles to mothers to cultivate knowledge and skills has been going well and effectively.*
