

## ABSTRACT

Mochamad Affandi. Relations Student Perceptions of Teachers and Teaching Ability Motivation to Physical Education Learning Outcomes SMPN 25 Jakarta Cipinang-East.

This study aims to determine the relationship between Student Perceptions of Teachers and Teaching Ability Motivation to Physical Education Learning Outcomes At SMPN 25 Cipinang, East Jakarta. This research was conducted in the first semester of the academic year 2015/2016 and retrieval of data on 18 until March 22, 2016 at Junior High School 25-Cipinang, East Jakarta.

The method used was a survey and tests that students answer the questions about the relationship of students' perceptions about teaching capabilities and learning motivation and learning outcomes of physical education at SMPN 25 Jakarta cipinang-east. The study population was a student of SMPN 25 Cipinang, East Jakarta totaling 240 students. The stages of research is preparation, data collection, processing and analysis of data, preparation of reports, and research results. The statistical technique used is correlational analysis which connects two independent variables and the dependent variable

The relationship between students' perceptions about the teaching capabilities of the learning outcomes of students with the equation  $Y = 11.797 + 0,764X1$ . The level of the relationship between the variables of physical education teachers' teaching ability (X1) with student learning outcomes (Y) designated by  $r_{xy1y}$  correlation coefficient = 0.764.

The relationship between students' motivation to learn the results of physical education siswa. Hubungan between students' motivation with student learning outcomes with the equation  $Y = 20.323 + 0.594 X2$ . Adapun variable level closeness of the relationship between students' motivation (X2) with student learning outcomes (Y) in  $r_{x2y}$  show the correlation coefficient = 0.594.

Relationships students' perceptions about the ability of teachers to teach and students' motivation to learn the results of the physical education teaching capabilities siswa. Hubungan between physical education (X1), and Motivation Penjas students (X2) with Penjas student learning outcomes (Y) is obtained by the equation  $Y = 2.131 + 0,625X1 + 0,332X2$ . The strength of the relationship between these three variables declared by  $r_{x1-2y} = 0.821$ .
