

ABSTRAK

ERVIN SAPUTRA: DEVELOPMENT OF INSTRUMENTS GUIDING YOUNG TALENT SOCCER (SKILL DEFENSE)

This research aims to develop an instrument scout young age (survival skills). The initial products of this instrument is 14 sheets of paper that was released by the Football Association of Indonesia (PSSI) for one child in the process of talent scouts. By using the paper it will get the deficiencies in the process of talent scouts. Of these shortcomings, the researchers developed an instrument into an instrument scout scouts android based on access via smart phone that will be in the process of talent scouts will be easier, effective and efficient in the process of talent scouts. With the development of this application can also minimize the use of paper.

Application development scout instrument is named The Scout. Product trials small groups performed on 11-December-2016 in the stadium Customs East Jakarta in League championship Kompas Gramedia U14, with the use of applications The scout is only one match for the small group trial that the match between the School of Football (SSB) Buperta against Football school (SSB) Cibinong Son and in the can 4 players selected by scouts League U14 Kompas Gramedia use applications the Scout, .sekaligus to find the weaknesses of this application and in the revision. Trials large group performed on 18-December-2016 in the stadium Customs East Jakarta League championship Kompas Gramedia U14, application usage The Scout trials of this large group performed in eight games in a week, after a revision of the small group trial so the large group trial run smoothly and can be 19 players selected by scouts League U14 Kompas Gramedia. Because this study is the development it is not impossible that this application will continue to develop in accordance with the process of the football scout who leads a perfect young age.
