

## ABSTRACT

**Wahyu Septiana. The Influence of Group Games Against the Fair Play at Kizara U-17 Years Football School. Skripsi: Jakarta, Recreation of Sport, Faculty of Sport Science, Universitas Negeri Jakarta, 2017**

This Research aims to determine the extent to which the influence of group games on Fair play at Kizara U-17 Football School. This research was conducted for 3 months starting on March 1, 2017 - May 30, 2017, Where the research was conducted at the Stadium Mini Pilar, Cikarang Utara, Kabupaten Bekasi. The method used in this research is pre-experimental method with research design using pre-test and post-test group that is to know influence of free variable of group game to variable bound Fair play at Kizara U-17 football school.

The sample of the study was the players of Kizara U-17 football school as many as 30 players. In this research data collection using research instruments in the form of questionnaires and analytical techniques in this study using t-statistical techniques to calculate the value of t-count compared with t-table on degrees of freedom  $n-1$  at a significant level of 0.05.

The results suggest that group play has an effect on Fair play at the Kizara U-17 football school. This is evident from the results of analysis of preliminary test data and Fair play final test analyzed by using t test. From the results of data analysis the average value of the initial test of 128.6 and the final test data of 148.13 and obtained the standard deviation value average difference of 1.99. Finding t-count by way  $(148,13-128,6) / 1,99$  obtained t-count value equal to 9,814.

Further tested with t-table at the level of trust  $\alpha = 0.05$  and degrees of freedom  $n-1 = 30 - 1 = 29$ , obtained t-table value of 2.042, thus the value of t-count  $> t$ -table value or  $9.814 > 2.042$ . Proven t-value  $> t$ -table value can be stated that the group game has an effect on Fair play at Kizara U-17 soccer school.
