

Training on motion animation media to improve competency of
Tutors of Early Childhood Education Tunas Mulia RW 07 sub districk Baru
districk Pasar Rebo, East Jakarta

ADI PRA YOGO

ABSTRACT

This study aims to provide knowledge and understanding through training on motion animation media creation to improve competency of Tutors of Early Childhood Education Tunas Mulia RW. 07 Kelurahan Baru Kecamatan Pasar Rebo, East Jakarta, in relation with the application of technological science particularly in the field of computer by creation of motion animation learning media means.

This study uses pre-experiment one group, pretest-posttest method, where the treatment made in this research is training on motion animation media creation (variable x) to improve competency of tutors (variable y). Subjects in this research are Tutors of Early Childhood Tunas Mulia RW.07 Kelurahan Baru Kecamatan Pasar Rebo East Jakarta, totaled 3 participants.

Data collection of this study was conducted by using multi-instrument consisting of instruments of questionnaires, observations, learning result test, and portfolio .assessment. Data analysis technique applied namely analysis technique with t test and by describing data and presentation

Results of motion animation media creation to improve competency was conducted through results of tests namely pre-test and post test to training participants. Marks of knowledge and comprehension test in pre test 3 respondents with 25 items of problems tested result in average mark of 5,00 for pre test and obtain average mark of 8,00 for post test therefore there is an increase of average mark of 3,00 after the participants were subjected to treatment of motion animation media creation training.

Conclusion which can be drawn of this study namely that the existence of this motion animation media creation training can help improving competency and understanding of the tutors of Early Childhood Education in creating animation media, the result is that the Tutors were able to create motion animation learning media which can be used in learning activities so to deal with the difficulties which later on the tutors have owned competency and understanding related to the animation learning media creation.
