7	Craftsman also the only job who can do refinement. What its mean by refinement? Ever heard weapon with G. or DG. or XG one? Only craftsman can upgrade equipment to XG one (increasing % of damage or defense depends on what eq).	craftsman refinement G DG XG eq	✓		✓				✓					
8	Craftsman is one of the jobs with possibility to deal high damage. For starting battle type craftsman (which will become a demolisionist later, and i assume there is a priest accompany you), put all stats into STR. For equipment, your main stats here is DAMAGE and ASPD (def and hp also important for survivability). With max aspd, 70-85% your enemies (for PVP for example) can't even move. it is back to how is your play style. You can put any stats you want, and any skills you want. 12	I start from berserkers pros. Berserker can be really tank in pvp with his retaliate skill which reflect dmg to the enemy and with his instinct skill, you are untouchable. His combo also awesome with additional % when the crit is out. If	pvp untouchable additional crit			✓				✓

	the gambler hit you, the damage will go back to him/her and if they are not stay alert, they can die from that reflect damage.	gambler			√									
13	A berserker is effective when he got his all skill which means, need high level to make berserker awesome(at least lv 210++). Defender and craftsmen are berserker enemies (assassin also maybe.. Need to be clarified). They can stun you which cause your combo break. If your enemy got buff from priest/apostle, your instinct skill won't help so much. It means, you need to heal yourself up with pot.	berserker defender craftsmen yourself pot	√ √		√ √		√							
14	For solo pve, berserker will be easier since berserker usually put some agi so their hit won't miss and berserker is one of the most economic friendly job.
