

ACKNOWLEDGEMENT

Bismillahirrahmannirrahim.Alhamdulillahirabbil'alamin, this thesis would never be completed without help of many people. In this opportunity, I would like to express my high and gratitude to people who helped me during the process of writing this thesis. First of all, I preciously thank Allah SWT, the Most Merciful and the Most Gracious, the lord of entire universe.

I want to express my high and sincere appreciation and gratitude to my supervisor, who provided so much help and support during the research:Dr. Muchlas Suseno, M.Pd. and Dr. Sudarya Permana, M.Hum., for your precious advises and patience in guiding me during the thesis writing.

My gratitude is also addressed to all my lecturers in PMPBI State University of Jakarta. They gave me a wonderful experience of learning and discovering. I also want to give my special thanks to all my friends in PMPBI for precious experiences and life lessons.

The biggest thank is delivered to SMA Budi Luhur Jakarta which has given help during the research to conduct this research.

Then, I want to express my sincere thanks to my beloved mom for your affection, advices, guidance, instruction and help in my life, your love is beyond any words and my little family namely my husband and my nice daughter, for your endless love. You are my everything.

Finally, this thesis is far from being perfect piece of writing, so suggestion and critics are nice welcome to make this thesis better.

Jakarta, August 2016
