

## **CHAPTER III**

### **METHODOLOGY**

This chapter discusses about research methodology that is used to carry on the study, the data and data source, data collection procedures, and data analysis procedures.

#### **3.1 Research Methodology**

This study uses a descriptive analytical study by analysing the clauses or sentences which indicate the archetype of angel in the novel. Descriptive Analytical study according to Cresswell involves the identification and interpretation of data already existing in documents, pictures and artefacts. It is a form of research in which events, ideas, concepts or artefacts are examined through analysis of documents, records, recordings or other media

#### **3.2 The data and Source of data**

The data of the study is the dialogues or narrations which contains or explains the archetype of angel. The source of data is Mortal Instruments : City of Bones novel by Cassandra Clare which published by Margaret K. McElderry on March 2007

### **3.3 Data Collecting Procedures**

The researcher did some steps in collecting the data:
