

Lampiran 1. Surat Permohonan Peminjaman Alat

Perihal : Permohonan Peminjaman Alat
 Lampiran : -

Kepada Yth.
Kepala Laboratorium Pendidikan Teknik Elektro UNJ
 di Tempat

Dengan hormat,
 Yang bertanda tangan dibawah ini saya,

Nama	: Putri Ramadhani Adam
NO Registrasi	: 5115152457
Prodi	: S1 Pendidikan Teknik Elektro
No. HP	: 081807442125
Program Kegiatan	: Penelitian Skripsi
Judul Penelitian	: Proteksi Motor Induksi Tiga Phasa dari Ketidakseimbangan Tegangan Sumber Berbasis Mikrokontroler Arduino Uno

Dengan ini, kami mengajukan permohonan untuk peminjaman :

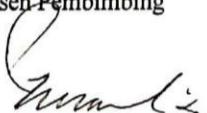

1. 1 unit motor induksi 3 fasa dan 1 unit alat ukur multimeter digital
2. 1 unit box panel dan 2 unit kontaktor
3. 1 unit TOR (*Thermal Overload Relay*)
4. 1 unit MCB 10 A 3 fasa dan 1 unit MCB 10 A 1 fasa

Peminjaman dilaksanakan pada tanggal 1 Desember – 15 Februari 2019.

Demikian surat permohonan ini saya sampaikan. Atas perhatian dan izin yang diberikan saya ucapan terima kasih.

Jakarta, 26 November 2019

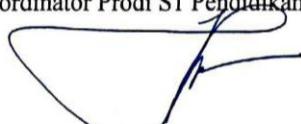

Mengetahui,
 Dosen Pembimbing

Drs. Purwanto Gendroyono, M.T.
 NIP. 195711291983031001

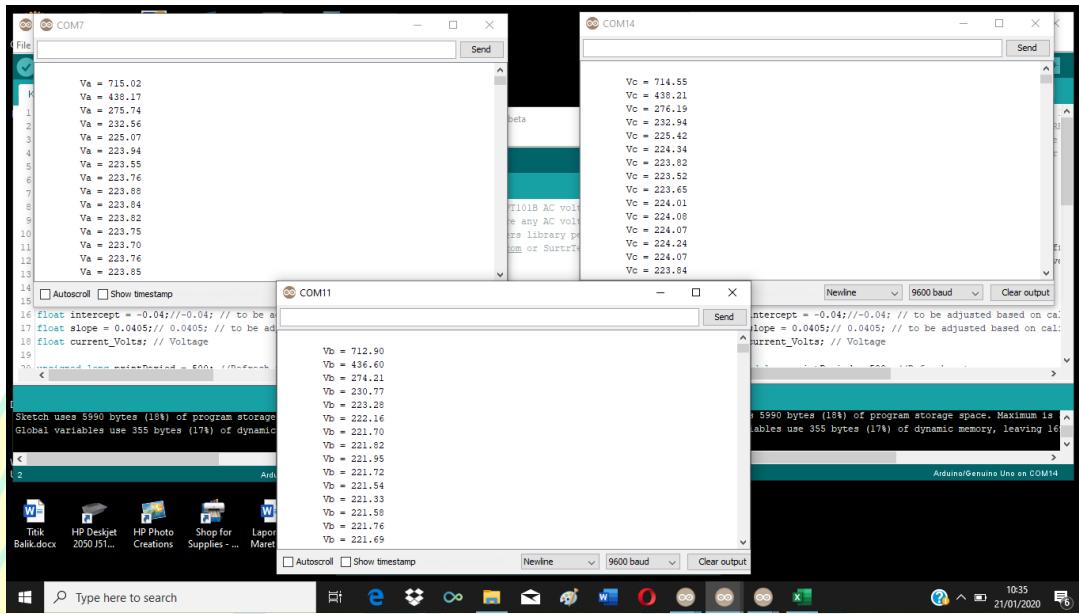

Peminjam

Putri Ramadhani Adam
 NIM. 5115152457

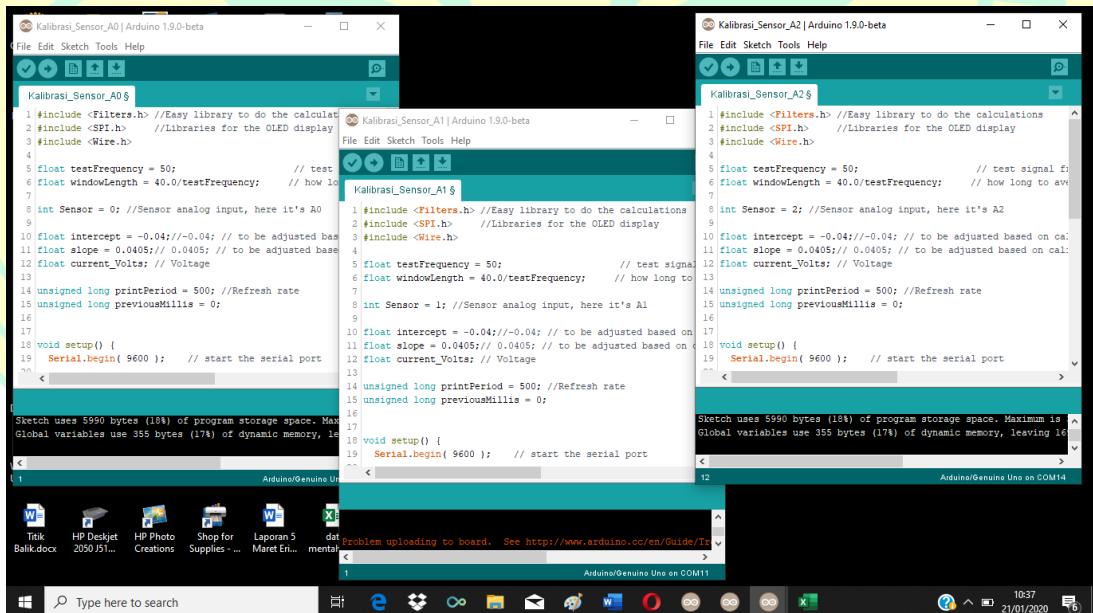

Menyetujui,
 Koordinator Prodi S1 Pendidikan Teknik Elektro

Massus Subekti, S. Pd., M.T.
 NIP. 197809072003121002

Uploading...

Sketch uses 5990 bytes (18%) of program storage space. Maximum is 32256 bytes.
Global variables use 355 bytes (17%) of dynamic memory, leaving 1693 bytes for local variables. Maximum is 2048 bytes.

Gambar 4. Tampilan Proses *Uploading* Pemrograman Arduino

The screenshot shows the Arduino IDE interface with the sketch 'Kalibrasi_Sensor_A2' open. The code includes comments for calibration parameters like test frequency, window length, and sensor input. The upload progress bar is at 100%, and the status bar indicates 'Done uploading'. The system tray shows the Arduino/Genuino Uno connected to COM14.

```

1 #include <Filters.h> //Easy library to do the calculations
2 #include <SPI.h> //Libraries for the OLED display
3 #include <Wire.h>
4
5 float testFrequency = 50; // test signal frequency (Hz)
6 float windowLength = 40.0/testFrequency; // how long to average the signal, for statistist
7
8 int Sensor = 2; //Sensor analog input, here it's A2
9

14 unsigned long printPeriod = 60000; //Refresh rate
15 unsigned long previousMillis = 0;
16
17
18 void setup() {
19   Serial.begin( 9600 ); // start the serial port
20 }
21
22
23 void loop() {
24
25   RunningStatistics inputStats; //Easy life lines, actual calculation of the RMS requires a load of coding
26   inputStats.setWindowSecs( windowLength );
27
28   while( true ) {
29     Sensor = analogRead(A2); // read the analog in value:
30
31   }
32
33 }
```

Sketch uses 5990 bytes (18%) of program storage space. Maximum is 32256 bytes.
Global variables use 355 bytes (17%) of dynamic memory, leaving 1693 bytes for local variables. Maximum is 2048 bytes.

Gambar 5. Tampilan Selesai Upload Pemrograman Arduino

The screenshot shows two Arduino IDE windows. The left window displays the code for 'Pengujian_Sensor_3' which reads three analog inputs. The right window is the serial monitor showing the output of these readings. The readings are: V_a = 216.24, V_a = 217.89, V_a = 217.35, V_a = 217.79, V_a = 218.22; V_c = 223.12, V_c = 222.63, V_c = 222.16, V_c = 224.01, V_c = 222.27; and V_b = 218.31, V_b = 219.96, V_b = 221.65, V_b = 222.10, V_b = 220.04. The system tray shows the Arduino/Genuino Uno connected to COM14.

```

V
Va = 216.24
Va = 217.89
Va = 217.35
Va = 217.79
Va = 218.22

V
Vc = 223.12
Vc = 222.63
Vc = 222.16
Vc = 224.01
Vc = 222.27

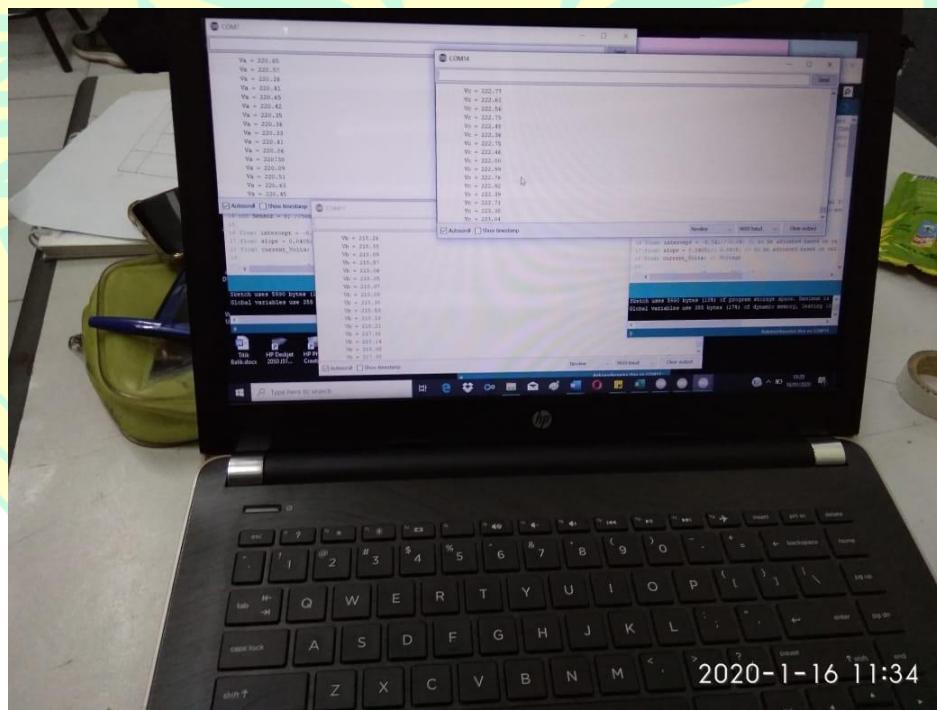

V
Vb = 218.31
Vb = 219.96
Vb = 221.65
Vb = 222.10
Vb = 220.04

Sketch uses 5990 bytes (18%) of program storage space. Maximum is 32256 bytes.
Global variables use 355 bytes (17%) of dynamic memory, leaving 1693 bytes for local variables. Maximum is 2048 bytes.

    current_Volts= current_Volts*(69.1916168)/(54.0231); //Further  
    calibrations for the amplitude  
    Serial.print( "\tVc = " );  
    Serial.print( current_Volts );  
}}}
```

RIWAYAT HIDUP

Putri Ramadhani Adam, akrab disapa dengan sebutan *Princess* atau Putri. Anak pertama dari dua bersaudara dari pasangan Bapak Kasdam dan Ibu Aah Mut'ah. Bertempat tinggal di Desa Karangmuncang, RT 07/RW 03 Dusun Pahing, Kecamatan Cigandamekar, Kuningan, Jawa Barat.

Riwayat Pendidikan, penulis menyelesaikan Pendidikan Sekolah Dasar di SD Negeri 2 Karangmuncang tahun 2009, pendidikan Sekolah Menengah Pertama di SMP Negeri 1 Cilimus tahun 2012, dan Sekolah Menengah Atas di SMA Negeri 1 Cilimus tahun 2015. Kemudian pada tahun 2015 melanjutkan studi di Universitas Negeri Jakarta, Fakultas Teknik, Jurusan Teknik Elektro, Program Studi Pendidikan Teknik Elektro melalui jalur Mandiri.

Riwayat Organisasi, penulis telah mengikuti beberapa organisasi yang berada di Jurusan Teknik Elektro dan Fakultas Teknik Universitas Negeri Jakarta diantaranya menjadi staff PSDM (Pengembangan Sumber Daya Mahasiswa) BEMP Pendidikan Teknik Elektro 2016-2017, Staff Kemuslimahan (Annisa) FSI Al-Biruni 2016-2017, Kepala Departemen PSDM (Pengembangan Sumber Daya Mahasiswa) 2017-2018, Sekretaris I BEM FT UNJ 2018-2019 dan Kepala Divisi Internal Forum Perempuan Fakultas Teknik Universitas Negeri Jakarta 2018-2019.

Pengalaman Mengajar, selama berkuliah, penulis telah melaksanakan Praktek Kegiatan Mengajar di SMK Kemala Bhayangkari 1 Jakarta pada bulan Agustus 2018 – November 2018.

Pengalaman Bekerja, selama berkuliah penulis telah melaksanakan Praktik Kerja Lapangan di PT PLN (Persero) Distribusi Jakarta Raya Area Lenteng Agung pada tanggal 22 Januari 2018 – 28 Februari 2018.
