OMRON

SYSMAC CP-series CP1E CPU Units
CP1E-E☐☐D☐-☐
CP1E-N☐☐D☐-☐/NA20D☐-☐

The CP1E Package PLCs: Economical, Easy to use, and Efficient

■The E-type Basic CPU Units provide cost performance and easy application with only basic functionality.

■The N and NA-types Application CPU Units support Programmable Terminal connection, position control, and inverter connection

**CP1E-E20DR-A**　　　**CP1E-N40DR-A**

Features

- Programming, setting, and monitoring with CX-Programmer.
- Easy connection with computers using commercially available USB cables
- With E30/40, N30/40/60 or NA20 CPU Units, Add I/O by Connecting Expansion I/O Units.
- With E30/40, N30/40/60 or NA20 CPU Units, Add Analog I/O or Temperature Inputs by Connecting Expansion Units.
- Quick-response inputs
- Input interrupts
- Complete High-speed Counter Functionality.
- Versatile pulse control for Transistor Output for N14/20/30/40/60 or NA20 CPU Units.
- PWM Outputs for Transistor Output for N14/20/30/40/60 or NA20 CPU Units.
- Built-in RS-232C Port for N/NA-type CPU Units.
- Mounting Serial Option Boards or Ethernet Option Board to N30/40/60 or NA20 CPU Units.
- Built-in analog I/O, two inputs and one output, for NA-type CPU Units.

Battery Set	For N/NA-type CP1E CPU Units **Note:** Mount a Battery to an N/NA-type CPU Unit if the data in the following areas must be backed up for power interruptions. • DM Area (D) (except backed up words in the DM Area), Holding Area (H), Counter Completion Flags (C), Counter Present Values (C), Auxiliary Area (A), and Clock Function (Use batteries within two years of manufacture.)									CP1W-BAT01	CE

Note: There are no accessories included with N/NA-type CP1E CPU Units. RS-232C connectors for the built-in RS-232C port and the Battery (CP1W-BAT01) are not included.

CP1E-E□□D□-□ CP1E-N□□D□-□/NA20D□-□

Options (for CP1E N30/40/60 or NA20 CPU Units)

The Options cannot be used for CP1E N14/20 CPU Units and all E-type CPU Units.

Product name	Specifications	Model	Standards
RS-232C Option Board	One RS-232C Option Board can be mounted to the Option Board slot. For CP1E N30/40/60 or NA20 CPU Units only. One RS-232C connector is included.	**CP1W-CIF01**	UC1, N, L, CE
RS-422A/485 Option Board	One RS-422A/485 Option Board can be mounted to the Option Board slot. For CP1E N30/40/60 or NA20 CPU Units only.	**CP1W-CIF11**	UC1, N, L, CE
RS-422A/485 Isolated-type Option Board		**CP1W-CIF12**	UC1, N, L, CE
Ethernet Option Board	One Ethernet Option Board can be mounted to the Option Board slot. CP1E CPU Units are supported by CP1W-CIF41 version 2.0 or higher. For CP1E N30/40/60 or NA20 CPU Units only. When using CP1W-CIF41, CX-Programmer version 9.12 or higher is required.	**CP1W-CIF41**	UC1, N, L, CE

Note: It is not possible to use a CP-series Ethernet Option Board version 1.0 (CP1W-CIF41), LCD Option Board (CP1W-DAM01), or Memory Card (CP1W-ME05M) with a CP1E CPU Unit.

Programming Devices

Product name	Specifications			Model	Standards
		Number of licenses	Media		
FA Integrated Tool Package CX-One Lite Ver.4.□	CX-One Lite is a subset of the complete CX-One package that provides only the Support Software required for micro PLC applications. CX-One Lite runs on the following OS. Windows 2000 (Service Pack 4 or higher), XP, Vista, or 7 Note: Except for 64-bit version. CX-One Lite Ver. 4.□ includes Micro PLC Edition CX-Programmer Ver.9.□.	1 license	CD	**CXONE-LT01C-V4**	--
FA Integrated Tool Package CX-One Package Ver. 4.□	CX-One is a comprehensive software package that integrates Support Software for OMRON PLCs and components. CX-One runs on the following OS. OS: Windows 2000 (Service Pack 4 or higher), XP, Vista, or 7 Note: Except for 64-bit version. CX-One Ver. 4.□ includes CX-Programmer Ver. 9.□.	1 license *1	DVD*2	**CXONE-AL01D-V4**	--

Note: 1. The E20, E30, E40, N20, N30 and N40 CPU Units are supported by CX-Programmer version 8.2 or higher.
The E10, E14, N14, N60, and NA20 CPU Units are supported by CX-Programmer version 9.03 or higher.
When Micro PLC Edition CX-Programmer is used, you need version 9.03 or higher.
2. The CX-One and CX-One Lite cannot be simultaneously installed on the same computer.
＊1 Multi licenses are available for the CX-One (3, 10, 30 or 50 licenses).
**＊2** The CX-One is also available on CD (CXONE-AL□□C-V4).
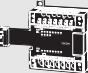

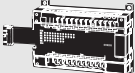

The following tables lists the Support Software that can be installed from CX-One

Dimensions (H × D × W)		CPU Unit with 10 I/O points (CP1E-E10D□-□): 90mm *1 ×85mm *2 × 66 mm CPU Unit with 14 or 20 I/O points (CP1E-□14D□-□/□20D□-□): 90mm *1 × 85mm *2 × 86 mm CPU Unit with 30 I/O points (CP1E-□30D□-□): 90mm *1 × 85mm *2 × 130 mm CPU Unit with 40 I/O points (CP1E-□40D□-□): 90mm *1 × 85mm *2 × 150 mm CPU Unit with 60 I/O points (CP1E-N60D□-□): 90mm *1 ×85mm *2 × 195 mm CPU Unit with 20 I/O points and built-in analog (CP1E-NA20D□-□): 90mm *1 ×85mm *2 × 130 mm	
Weight		CPU Unit with 10 I/O points (CP1E-E10D□-□): 300g max. CPU Unit with 14 I/O points (CP1E-□14D□-□): 360g max. CPU Unit with 20 I/O points (CP1E-□20D□-□): 370g max. CPU Unit with 30 I/O points (CP1E-□30D□-□): 600g max. CPU Unit with 40 I/O points (CP1E-□40D□-□): 660g max. CPU Unit with 60 I/O points (CP1E-N60D□-□): 850g max. CPU Unit with 20 I/O points and built-in analog (CP1E-NA20D□-□): 680g max.	
Electrical specifications	Supply voltage	100 to 240 VAC 50/60 Hz	24 VDC
	Operating voltage range	85 to 264 VAC	20.4 to 26.4 VDC
	Power consumption	15 VA/100 VAC max. 25 VA/240 VAC max. (CP1E-E10D□-A/□14D□-A/□20D□-A)	9 W max. (CP1E-E10D□-D) 13 W max. (CP1E-N14D□-D/N20D□-D)
		50 VA/100 VAC max. 70 VA/240 VAC max. (CP1E-NA20D□-A/□30D□-A/□40D□-A/N60D□-A)	20 W max. (CP1E-NA20D□-D/N30D□-D/N40D□-D/N60D□-D) *4
	Inrush current	120 VAC, 20 A for 8 ms max. for cold start at room temperature 240 VAC, 40 A for 8 ms max. for cold start at room temperature	24 VDC, 30 A for 20 ms max. for cold start at room temperature
	External power supply *3	Not provided. (CP1E-E10D□-A/□14D□-A/□20D□-A) 24 VDC, 300 mA (CP1E-NA20D□-A/□30D□-A/□40D□-A/N60D□-A)	Not provided
	Insulation resistance	20 MΩ min. (at 500 VDC) between the external AC terminals and GR terminals	Except between DC primary current and DC secondary current
	Dielectric strength	2,300 VAC 50/60Hz for 1 min between AC external and GR terminals Leakage current: 5 mA max.	Except between DC primary current and DC secondary current
	Power OFF detection time	10 ms min.	2 ms min.
Application environment	Ambient operating temperature	0 to 55 °C	
	Ambient humidity	10% to 90%	
	Atmosphere	No corrosive gas.	
	Ambient storage temperature	-20 to 75 °C (excluding battery)	
	Altitude	2,000 m max.	
	Pollution degree	2 or less: Conforms to JIS B3502 and IEC 61131-2.	
	Noise resistance	2 kV on power supply line (Conforms to IEC61000-4-4.)	
	Overvoltage category	Category II: Conforms to JIS B3502 and IEC 61131-2.	
	EMC Immunity Level	Zone B	
	Vibration resistance	Conforms to JIS 60068-2-6. 5 to 8.4 Hz with 3.5-mm amplitude, 8.4 to 150 Hz Acceleration of 9.8 m/s^2 for 100 min in X, Y, and Z directions (10 sweeps of 10 min each = 100 min total)	
	Shock resistance	Conforms to JIS 60068-2-27. 147 m/s^2, 3 times in X, Y, and Z directions	
Terminal block		Fixed (not removable)	
Terminal screw size		M3	
Applicable standards		Conforms to EC Directive	
Grounding method		Ground to 100 Ω or less.	

*1 Total of 110 mm with mounting brackets.
*2 Excluding cables.
*3 Use the external power supply to power input devices. Do not use it to drive output devices.
*4 This is the rated value for the maximum system configuration. Use the following formula to calculate power consumption for CPU Units with DC power.
Formula: DC power consumption = (5V current consumption × 5 V/70% (internal power efficiency) + 24V current consumption) × 1.1(current fluctuation factor)
The above calculation results show that a DC power supply with a greater capacity is required.

Communications	B-type Peripheral USB Port		Conforming to USB 2.0 B type connector	
		Transmission distance	5 m max.	
	Built-in RS-232C port		No built-in RS-232C port	Interface: Conforms to EIA RS-232C.
		Communications method		Half duplex
		synchronization		Start-stop
		Baud rate		1.2, 2.4, 4.8, 9.6, 19.2, 38.4, 57.6, or 115.2 kbps
		Transmission distance		15 m max.
		Supported protocol		• Host Link • 1:N NT Link • No-protocol mode • Serial PLC Links (master, slave) • Modbus-RTU Easy Master
	Serial Option port		Option Board cannot be mounted.	1 port (Option Board can be mounted only to N30/40/60 and NA20 CPU Units.)
		Mountable Option Boards		• One RS-232C port: CP1W-CIF01 • One RS-422A/485 port (not isolated): CP1W-CIF11 • One RS-422A/485 port (isolated): CP1W-CIF12 • One Ethernet port: CP1W-CIF41
		Communications method		Depends on Option Board.
		synchronization		Depends on Option Board.
		Baud rate		1.2, 2.4, 4.8, 9.6, 19.2, 38.4, 57.6, or 115.2 kbps
		Compatible protocols		• Host Link • 1:N NT Link • No-protocol mode • Serial PLC Links (master, slave) • Modbus-RTU Easy Master
Number of tasks			17 • One cyclic execution task • One scheduled interrupt task (always interrupt task 1) • Six input interrupt tasks (interrupt tasks 2 to 7) • Sixteen high-speed counter interrupt tasks (interrupt tasks 1 to 16)	
Maximum subroutine number			128	
Maximum jump number			128	
Scheduled interrupt tasks			1 interrupt task	
Clock			Clock function not included. The time of error occurrence displays 01-01-01 01:01:01 Sunday	Included. Accuracy (monthly deviation): -4.5 min to -0.5 min at ambient temperature of 55ºC, -2.0 min to +2.0 min at ambient temperature of 25ºC, -2.5 min to +1.5 min at ambient temperature of 0ºC
Memory backup	Built-in EEPROM		Ladder programs and parameters are automatically saved to built-in EEPROM A section of the Data Memory Area can be saved to the built-in EEPROM.	
	Battery backup With CP1W-BAT01 Battery (Sold separately)		Battery cannot be mounted.	CP1W-BAT01 can be used. Maximum battery service life: 5 years Backup Time Guaranteed value (ambient temperature: 55ºC): 13,000 hours (approx. 1.5 years) Effective value (ambient temperature: 25ºC): 43,000 hours (approx. 5 years)
CIO Area	Input Bits		1,600 bits (100 words): CIO 0.00 to CIO 99.15 (CIO 00 to CIO 99)	
	Output Bits		1,600 bits (100 words): CIO 100.00 to CIO 199.15 (CIO 100 to CIO 199)	
	Serial PLC Link Words		1,440 bits (90 words): CIO 200.00 to CIO 289.15 (words CIO 200 to CIO 289)	
Work Area (W)			1,600 bits (100 words): W0.00 to W99.15 (W0 to W99)	
Holding Area (H)			800 bits (50 words): H0.00 to H49.15 (H0 to H49) Bits in this area maintain their ON/OFF status when operating mode is changed.	
Auxiliary Area (A)			Read-only: 7,168 bits (448 words) A0 to A447 Read/write: 4,896 bits (306 words) in words A448 to A753	
Temporary Relay Area (TR) (TR Area)			16 bits: TR0 to TR15	
Timer Area (T)			256 timer numbers (T0 to T255 (separate from counters))	
Counter Area (C)			256 counter numbers (C0 to C255 (separate from timers))	
Data Memory Area (D)			2 Kwords: D0 to D2047 Of these, 1,500 words can be saved to the backup memory (built-in EEPROM) using settings in the Auxiliary Area.	8 Kwords: D0 to D8191 Of these, 7,000 words can be saved to the backup memory (built-in EEP-ROM) using settings in the Auxiliary Area
Operating modes			PROGRAM mode: Program execution is stopped. 　　　　　　　Preparations can be executed prior to program execution in this mode. MONITOR mode: Programs are executed. 　　　　　　　Some operations, such as online editing, and changes to present values in I/O memory, are enabled in this mode. RUN mode: Programs are executed. 　　　　　　　This is the normal operating mode.	

OMRON

Function Specifications

Function				Function description
Cycle time management	Minimum cycle time			Makes the cycle time consistent.
	Monitoring the cycle time			Monitors the cycle time.
CPU Unit built-in functions	Inputs	High-speed counter inputs	High-speed pulse inputs	High-speed pulses from devices such as a rotary encoder are counted. The counted values are stored in the Auxiliary Area. Interrupt tasks can be executed when target is reached or by range comparison.
			Input pulse frequency measurement	The frequency of pulses input by the PRV instruction is measured.
		Interrupt inputs		Relevant interrupt tasks are executed during the cycle when the CPU Unit built-in inputs turn ON or turn OFF.
		Quick-response inputs		Inputs can be read without being affected by cycle time. Use the quick-response inputs to read signals shorter than the cycle time.
		Normal inputs	I/O refreshing — Cyclic refreshing	The CPU Unit's built-in I/O are cyclically refreshed.
			I/O refreshing — Immediate refreshing	I/O refreshing by immediate refreshing instructions
			Input response times	Input constants can be set for Basic I/O Units. The response time can be increased to reduce the effects of chattering and noise at input contacts. The response time can be decreased to enable detecting shorter input pulses.
	Outputs	Pulse outputs (Models with transistor outputs only)	Pulse control	A pulse signal is output and positioning or speed control is performed with a servo driver that accepts a pulse input. Continuous mode for speed control or independent mode for position control can be used. There are functions for changing to positioning during speed control and for changing the target value during positioning.
			Origin positioning	Origin searches and origin returns
		PWM outputs (Models with transistor outputs only)		Pulses for which the duty ratio (ratio between ON time and OFF time during one pulse cycle) can be set are output.
		Normal outputs	Load OFF function	All of the outputs on the CPU Unit's I/O can be turned OFF when an error occurs in RUN or MONITOR mode.
	Built-in analog	Analog input		Convert analog signal into digital value range from 0 to 6,000.
		Analog output		Convert digital value range from 0 to 6,000 into analog signal.
Expansion I/O Units and Expansion Units	Functions supported by both Expansion I/O Unit and Expansion Unit	I/O refreshing — Cyclic refreshing		The Expansion I/O Units and Expansion Units are cyclically refreshed.
		I/O refreshing — Refreshing by IORF		I/O refreshing by IORF instruction
		Load OFF function		All of the outputs on Expansion I/O Units and Expansion Units are turned OFF (0000 hex) when an error occurs in RUN or MONITOR mode.
	Expansion I/O Units	Input response times		The response time can be increased to reduce the effects of chattering and noise at input contacts. The response time can be decreased to enable detecting shorter input pulses.
	Expansion Units	Unit error detection		Errors in Expansion Units are detected. The CPU Unit is notified that the Expansion Unit stopped due to an error.
Memory management functions	Holding I/O memory when changing operating modes			The status of I/O memory can be held when the operating mode is changed. The forced-set/reset status can be held when the operating mode is changed.
	Automatic backup to the backup memory (built-in EEPROM)			Automatic backup of ladder programs and parameter area to the backup memory (built-in EEPROM)
Communications	Peripheral USB port	Peripheral bus (toolbus)		For communications with programming device (CX-Programmer).
	Serial port (N/NA-type only)			--
		Host Link (SYSWAY) communications		Host Link commands can be sent from a PT or a computer to read/write I/O memory, and perform other operations for PLC.
		No-protocol communications		I/O instructions for communications ports (TXD/RXD instructions) can be used for data transfer with peripheral devices such as bar code readers.
		NT Link communications		I/O memory in the PLC can be allocated and directly linked to various PT functions, including status control areas, status notification areas, touch switches, lamps, memory tables, and other objects.
		Serial PLC Links		Up to ten words per Unit can be shared by up to nine CPU Units, including one Polling Unit and eight Polled Units. **Note:** Programmable Terminal (PT) cannot be connected.
		Modbus-RTU Easy Master function		Modbus-RTU commands are sent by the Modbus-RTU Master function. Modbus slaves, such as inverters, can be easily controlled with serial communications.
Interrupt	Scheduled interrupts			Tasks can be executed at a specified interval (1.0 ms min., Unit: 0.1 ms).
	Interrupt inputs			Interrupt tasks are processed when the built-in input turns ON or OFF.
	High-speed counter interrupts			This function counts input pulses with the CPU Unit's built-in high-speed counter and executes an interrupt task when the count reaches the preset value or falls within a preset range (target value or zone comparison).

Function			Function description
Power supply management	Memory protection		Holding Area data, DM Area data, Counter Completion Flags, and counter present values are held even when power is turned OFF. This function can be used only with an N/NA-type CPU Unit and only when the Battery Set (sold separately) is mounted.
	Number of power interruptions counter		The number of times power has been interrupted is counted.
Debugging	Online editing		The program can be changed during operation in MONITOR mode or PROGRAM mode.
	Force-set/reset		Specified bits can be set or reset.
	Differentiate monitoring		ON/OFF changes in specified bits can be monitored.
	Storing the stop position at errors		The location and task number where execution stopped for a program error is recorded.
	Program check		The programs can be checked for items such as no END instruction and FALS/FAL errors at startup.
Self-diagnosis and restoration	Error Log		Details and the time of occurrence of error codes predefined by the CPU Unit are stored.
	CPU error detection		CPU Unit WDT errors are detected.
	User-defined failure diagnosis		Errors can be generated for user-specified conditions: Non-fatal errors (FAL) and fatal errors (FALS).
	Load OFF function		The built-in outputs, Expansion I/O Unit outputs, and Expansion Unit outputs are turned OFF.
	Non-fatal error detection	System FAL error detection (User-defined non-fatal error)	This function generates a non-fatal (FAL) error when the user-defined conditions are met in program.
		Backup memory error detection	This function detects when data in the backup memory (built-in EEPROM) that stores the ladder program is corrupted.
		PLC Setup error detection	This function detects setting errors in the PLC Setup.
		Option Board errors	This function detects when the Option Board is malfunctioning or disconnected.
		Battery error detection (N/NA-type CPU Units only)	This function detects when the battery voltage is low or the battery is disconnected. **Note:** This function is valid only when a battery is mounted and the *Do not detect battery error* Check Box is cleared in the PLC Setup.
		Built-in analog error	This function detects when a built-in analog I/O error occurs and stops the operation of built-in analog I/O.
	Fatal Error Detection	Memory error detection	This function detects errors that occur in memory of the CPU Unit.
		I/O bus error detection	This function detects errors that occur during data transfer between the CPU Unit and another Unit.
		Too Many I/O Points Error Detection	This function detects when more than the maximum number of CP1W Expansion I/O Units and Expansion Units are connected to the PLC.
		Program error detection	This function detects when there is an error in the program. See the following for details.
		Instruction processing error detection	This function detects an error when the given data value is invalid when executing an instruction, or execution of instruction between tasks was attempted.
		Indirect DM addressing BCD error	This function detects an error when an indirect DM address in BCD mode is not BCD.
		Illegal area access error detection	This function detects an error when an attempt is made to access an illegal area with an instruction operand.
		No END error detection	This function detects an error when there is no END instruction at the end of the program.
		Task error detection	The execution condition for an interrupt task was met but there is no interrupt task with the specified number.
		overflow error detection	This function detects an error when too many differentiated instructions are entered or deleted during online editing (131,072 times or more).
		Invalid instruction error detection	This function detects an error when an attempt is made to execute an instruction that is not defined in the system.
		User program area overflow error detection	This function detects an error when instruction data is stored after the last address in user program area.
		Cycle time exceeded error detection	This function monitors the cycle time (10 to 1,000 ms) and stops the operation when the set value is exceeded.
		System FALS error detection (user-defined fatal error)	This function generates a fatal (FALS) error when the user-defined conditions are met in program.
Maintenance	Automatic online connection via network		This function enables automatically connecting to the PLC online when the CX-Programmer is directly connected by a serial connection (peripheral USB port or serial port).
Security functions	Read protection using password		This function protects user memory. Read protection: Set a password using the CX-Programmer. Overwrite protection is not provided.
	Write protection from FINS commands		This function prohibits writing by using FINS commands sent over the network.

Internal Memory in the CPU Units

CPU Unit Memory Backup Structure

The internal memory in the CPU Unit consists of built-in RAM and built-in EEPROM. The built-in RAM is used as execution memory and the built-in EEPROM is used as backup memory.
CPU Unit

Built-in EEPROM	Built-in RAM
Backup memory	Execution Memory

User Program Area (Backup) ← Automatic backup → User Program Area
Read at startup

PLC Setup ← Automatic backup → PLC Setup
Read at startup

I/O Memory Areas

DM Area ← Backup using bit in Auxiliary Area ← DM Area
DM Area data read at startup

Area where data is backed up even if the power supply is interrupted for longer than the back-up time of the built-in capacitor.

Area where data is cleared if the power supply is interrupted for longer than the back-up time of the built-in capacitor.

Data is retained even if the power supply is interrupted for longer than the backup time of the built-in capacitor.

If a CP1W-BAT01 Battery (sold separately) is mounted to an N/NA-type CPU Unit, which is normally backed up by a built-in capacitor, data will be backed up by the battery.

● Precautions for Correct Use

Create a system and write the ladder programs so that problems will not occur in the system if the data in these area may be unstable.
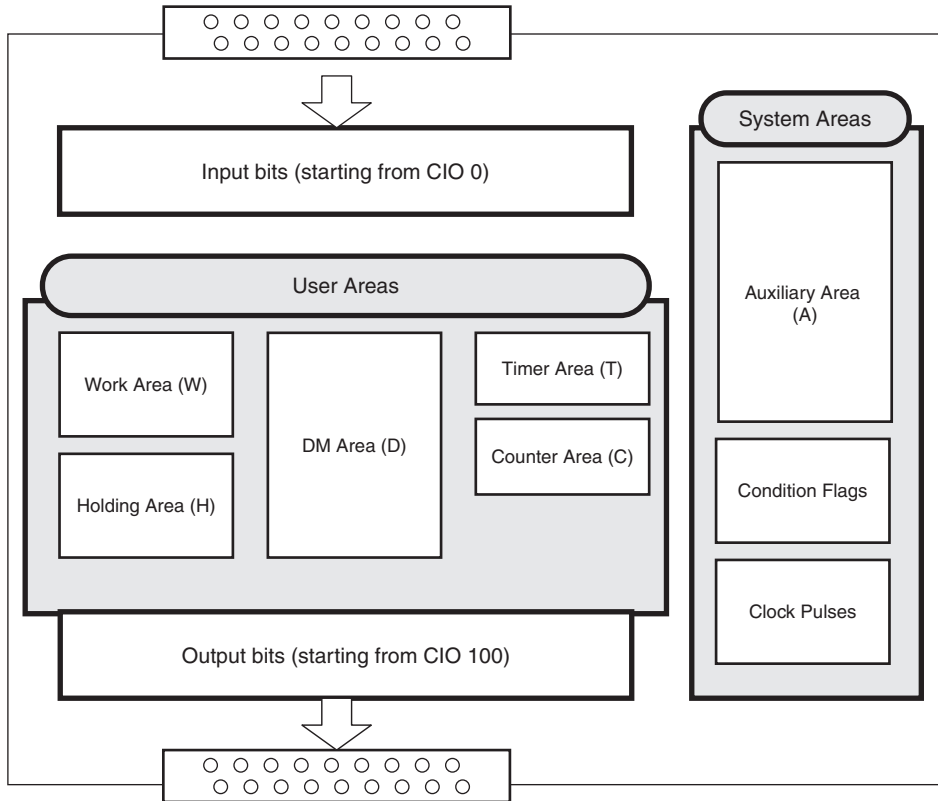

- Data in areas such as the DM area (D), Holding Area (H), the Counter Present Values (C) and the status of Counter Completion Flags (C), which is retained by the battery, may be unstable when the power supply is turned off (Except for the DM area that are retained by the built-in EEPROM using the Auxilliary Area bit.)
- The error log, and clock data (N/NA-type CPU Unit only) in the Auxiliary Area will become unstable. Other words and bits in the Auxiliary Area will be cleared to their default values.

The built-in capacitor's backup time varies with the ambient temperature as shown in the following graph.

Backup time of built-in capacitor

- 50 hours
- 40 hours
- 25 hours
- 20 hours
- 9 hours
- 7 hours

CP1E E-type CPU Unit

CP1E N/NA-type CPU Unit

25℃   40℃   60℃

Ambient temperature

I/O Memory Areas

Data can be read and written to I/O memory from the ladder programs. I/O memory consists of an area for I/O with external devices, user areas, and system areas.

I/O Memory Areas

Name		No. of bits	Word addresses	Remarks
CIO Area	Input Bits	1,600 bits (100 words)	CIO 0 to CIO 99	For NA-type, CIO90, CIO91 is occupied by analog input 0, 1.
	Output Bits	1,600 bits (100 words)	CIO 100 to CIO 199	For NA-type, CIO190 is occupied by analog output 0.
	Serial PLC Link Words	1,440 bits (90 words)	CIO 200 to CIO 289	--
Work Area (W)		1,600 bits (100 words)	W0 to W99	--
Holding Area (H)		800 bits (50 words)	H0 to H49	Data in this area is retained during power interruptions if a Battery Set (sold separately) is mounted to an N/NA-type CPU Unit.
Data Memory Area (D)	E-type CPU Unit	2K words	D0 to D2047	Data in specified words of the DM Area can be retained in the built-in EEPROM in the backup memory by using a bit in the Auxiliary Area. Applicable words: D0 to D1499 (One word can be specified at a time.)
	N/NA-type CPU Unit	8K words	D0 to D8191	Data in specified words of the DM Area can be retained in the built-in EEPROM in the backup memory by using a bit in the Auxiliary Area. Applicable words: D0 to D6999 (One word can be specified at a time.)
Timer Area (T)	Present values	256	T0 to T255	--
	Timer Completion Flags	256		--
Counter Area (C)	Present values	256	C0 to C255	Data in this area is retained during power interruptions if a Battery Set (sold separately) is mounted to an N/NA-type CPU Unit.
	Counter Completion Flags	256		--
Auxiliary Area (A)	Read only	7168 bits (448 words)	A0 to A447	Data in this area is retained during power interruptions if a Battery Set (sold separately) is mounted to an N/NA-type CPU Unit.
	Read-write	4,896 bits (306 words)	A448 to A753	

Backing Up and Restoring DM Area Data

The contents of the DM Area (D) will become unstable if the power supply is interrupted for longer than the backup time of the built-in capacitor (50 hours for an E-type CPU Unit, 40 hours for an N/NA-type CPU Unit without a Battery).

The contents of the specified words in the DM Area data can be backed up from RAM to the built-in EEPROM backup memory during operation by turning ON a bit in the Auxiliary Area. The number of DM Area words to back up is specified in the Number of CH of DM for backup Box in the PLC Setup. If the Restore D0- from backup memory Check Box is selected in the PLC Setup, the backup data will automatically be restored to RAM when the power is turned back ON so that data is not lost even if power is interrupted.
Conditions for Executing Backup

Specified words starting from D0 in the RAM can be saved to the built-in EEPROM backup memory by turning ON A751.15.
(These words are called the DM backup words and the data is called the DM backup data.)
A751.15 (DM Backup Save Start Bit) can be used in any operating mode (RUN, MONITOR, or PROGRAM mode).

Words That Can Be Backed Up

- E-type CP1E CPU Units: D0 to D1499
- N/NA-type CP1E CPU Units: D0 to D6999

Number of Words To Back Up

The number of words to back up starting from D0 is set in the *Number of CH of DM for backup* Box in the *Startup Data Read* Area in the PLC Setup.

Restoring DM Backup Data to RAM When Power Is Turned ON

The DM backup data can be restored to RAM when power is turned ON by selecting the *Restore D0- from backup memory* Check Box in the *Startup Data Read* Area in the PLC Setup.
The DM backup data will be read from the backup memory even if the *Clear retained memory area (HR/DM/CNT)* Check Box is selected in the PLC Setup.

Allocating Built-in Inputs to Functions

Input terminals are allocated functions by setting parameters in the PLC Setup. Set the PLC Setup so that each terminal is used for only one function.

| CPU Unit with I/O Points	Input terminal block		Settings in PLC Setup							
			Interrupt input setting on Built-in Input Tab Page			High-speed counter 0 to 3 setting on Built-in Input Tab Page			Origin search settings on Pulse Output 0/1 Tab Page	
	Terminal block label	Terminal number	Normal	Interrupt	Quick	Single-phase (increment pulse input)	Two-phase (differential phase x4 or up/down)	Two-phase (pulse/direction)	CPU Unit with 20 to 60 points	CPU Unit with 14 I/O points
			Normal input	Input interrupt	Quick-response input

Output Specifications

●Output Specifications for Relay Outputs

Item			Specification
Maximum switching capacity			250 VAC/2 A (cosφ = 1) 2 A, 24 VDC (4 A/common)
Minimum switching capacity			5 VDC, 10 mA
Service life of relay	**Electrical**	**Resistive load**	200,000 operations (24 VDC)
		Inductive load	70,000 operations (250 VAC, cosφ = 0.4)
	Mechanical		20,000,000 operations
ON delay			15 ms max.
OFF response time			15 ms max.
Circuit configuration			

Estimating the Service Life of Relays

Under normal conditions, the service life of output contacts is as shown above. The service life of relays is as shown in the following diagram as a guideline

CP1E-□□DR-□
Relationship between Continuous Simultaneous ON Rate and Ambient Temperature

There are restrictions on the power supply voltage and output load current imposed by the ambient temperature. Make sure that the power supply voltage and output load current are within the following ranges.

CP1E-N14DR-D/CP1E-N20DR-D	CP1E-N30DR-D	CP1E-N40DR-D

CP1E-□14DR-A/CP1E-□20DR-A/CP1E-N20DT□-□	CP1E-NA20DR-A	CP1E-N60DR-D
Note: The above restrictions apply to the relay output load current from the CPU Unit even if Expansion I/O Units are not connected.

●**Output Specifications for Transistor Outputs (Sinking or Sourcing)**

Normal Outputs

Maximum switching capacity	0.3 A/output, 0.9 A/common ＊1 4.5 to 30 VDC CP1E-E10D□-□: 0.9 A/Unit CP1E-N14D□-□: 1.5 A/Unit CP1E-N40D□-□: 3.6 A/Unit CP1E-N60D□-□: 5.4 A/Unit	CP1E-N20D□-□: 1.8 A/Unit CP1E-N30D□-□: 2.7 A/Unit CP1E-NA20D□-□: 1.8 A/Unit
Minimum switching capacity	1 mA 4.5 to 30 VDC	
Leakage current	0.1mA max.	
Residual voltage	E-type CPU Unit: 1.5 V max. N/NA-type CPU Unit: 0.6 V max.	1.5V max.
ON response time	0.1 ms max.	0.1 ms max.
OFF response time	E-type CPU Unit: 1 ms max. N/NA-type CPU Unit: 0.1 ms max.	1 ms max.
Fuse	Not provided.	
Circuit configuration	**N/NA-type CPU Unit: Normal outputs CIO 100.00 to CIO 100.01 (sinking)** **N/NA-type CPU Unit: Normal outputs CIO 100.00 to CIO 100.01 (sourcing)**	**E-type CPU Unit: Normal outputs CIO 100.00 to CIO 100.03 (sinking) N/NA-type CPU Unit: Normal outputs CIO 100.02 to CIO 102.07 (sinking)** **E-type CPU Unit: Normal outputs CIO 100.01 to CIO 100.03 (sourcing) N/NA-type CPU Unit: Normal outputs CIO 100.02 to CIO 102.07 (sourcing)**

Note: Do not connect a load to an output terminal or apply a voltage in excess of the maximum switching capacity.
＊1 Also do not exceed 0.9 A for the total for CIO 100.00 to CIO 100.03. (CIO 100.00 to CIO 100.03 is different common.)
＊2 The bits that can be used depend on the model of CPU Unit.

Pulse Outputs (CIO 100.00 and CIO 100.01)

Item	Specification
Maximum switching capacity	100 mA/4.5 to 26.4 VDC
Minimum switching capacity	7 mA/4.5 to 26.4 VDC
Maximum output frequency	100 kHz
Output waveform	OFF 90% ON 10% 4 s min. 2 s min.

Note: 1. The load for the above values is assumed to be the resistance load, and does not take into account the impedance for the connecting cable to the load.
2. Due to distortions in pulse waveforms resulting from connecting cable impedance, the pulse widths in actual operation may be smaller than the values shown above.
3. The OFF and ON refer to the output transistor. The output transistor is ON at level "L".

PWM Output (CIO 100.01)

Item	Specification
Maximum switching capacity	30 mA/4.5 to 26.4 VDC
Maximum output frequency	32 kHz
PWM output accuracy	For ON duty +1%, .0%:10 kHz output For ON duty +5%, .0%: 0 to 32 kHz output
Output waveform	OFF ON t_{ON} T ON duty$= \dfrac{t_{ON}}{T} \times 100\%$

Note: The OFF and ON refer to the output transistor. The output transistor is ON at level "L".

Built-in Analog I/O (NA-type CPU Units)

●Analog Input Specifications

Item		Voltage input	Current input
Number of inputs		2 inputs (Allocated 2 words: CIO 90 to CIO 91.)	
Input signal range		0 to 5 V, 1 to 5 V, 0 to 10 V, or -10 to 10 V	0 to 20 mA or 4 to 20 mA
Max. rated input		±15 V	±30 mA
External input impedance		1 MΩ min.	Approx. 250Ω
Resolution		1/6000	
Overall accuracy	At 25°C	±0.3% full scale	±0.4% full scale
	0 to 55°C	±0.6% full scale	±0.8% full scale
A/D conversion data	-10 to +10 V	F448 to 0BB8 hex FS	
	Other ranges	0000 to 1770 hex FS	
Averaging function		Supported (Set for individual inputs in the PLC Setup.)	
Open-circuit detection function		Supported (Value when disconnected: 8000 hex)	

●Analog Output Specifications

Item		Voltage output	Current output
Number of outputs		1 output (Allocated 1 word: CIO 190.)	
Output signal range		0 to 5 V, 1 to 5 V, 0 to 10 V, or -10 to 10 V	0 to 20 mA or 4 to 20 mA
Allowable external output load resistance		1 kΩ min.	600Ω max.
External input impedance		0.5Ωmax.	---
Resolution		1/6000	
Overall accuracy	At 25°C	±0.4% full scale ✷	
	0 to 55°C	±0.8% full scale ✷	
D/A conversion data	-10 to +10 V	F448 to 0BB8 hex FS	
	Other ranges	0000 to 1770 hex FS	

✷ In 0 to 20 mA mode, accuracy cannot be ensured at 0.2 mA or less.

●Shared I/O Specifications

Item	Specification
Conversion time	2 ms/point (6 ms total for 2 analog inputs and 1 analog output.)
Isolation method	Photocoupler isolation between analog I/O terminals and internal circuits. No isolation between analog I/O signals.

# Specifications of Expansion I/O Units and Expansion Units

Expandable CPU Units

- Expansion I/O Units and Expansion Units cannot be connected to E10/14/20 or N14/20 CPU Units.
- A total of up to three Expansion I/O Units and Expansion Units can be connected to an E30/40, N30/40/60 or NA20 CPU Unit.

●CP1E E10/14/20 or N14/20 CPU Unit

CP-series Expansion Units and Expansion I/O Units cannot be connected.

●CP1E E30/40, N30/40/60 or NA20 CPU Unit

A total of up to three CP-series Expansion I/O Units and Expansion Units can be connected.
Connection Methods

Connection cables for the Expansion I/O Units and Expansion Units are used to connect the Units. The length can be extended by using a CP1W-CN811 I/O Connection Cable (length: 800 m).

Maximum Number of I/O Points for an Expanded System

CPU Unit	Built-in I/O on CPU Unit			Built-in Analog		Total number of Expansion I/O Units and Expansion Units that can be connected	Number of inputs: 24 Number of outputs: 16 Total number of I/O points when three CP1W-40ED□ Expansion I/O Units are connected		
	Total	Number of inputs	Number of outputs	AD	DA		Total	Number of inputs	Number of outputs
CP1E-E10D□-□	10	6	4	None	None	Not possible.	10	6	4

CP1E-NA20D□-□	20	12	8	2	1		140	84	56

Restrictions on External Power Supply Capacity

The following restrictions apply when using the CPU Unit's external power supply.

●AC-power-supply E30/40, N30/40/60 or NA20 CPU Unit

The power supply capacity is restricted for AC-power-supply E30/40, N30/40/60 or NA20 CPU Units. It may not be possible to use the full 300 mA of the external power supply, though a CPU Unit can connect any CP-series Expansion I/O Unit or Expansion Unit.
The entire 300 mA from the external power supply can be used if Expansion Units and Expansion I/O Units are not connected.
Refer to the CP1E CPU Unit Hardware Manual (Cat. No. W479) for details.

●AC-power-supply or DC-power-supply E10/14/20, N14/20 CPU Unit

There is no external power supply on AC-power-supply or DC-power-supply E10/14/20, N14/20 CPU Units.

Specifications of Expansion I/O Units

●Input Specifications (CP1W-40EDR/40EDT/40EDT1/20EDR1/20EDT/20EDT1/8ED)

Item	Specification
Input voltage	24 VDC +10%/-15%
Input impedance	4.7 kΩ
Input current	5 mA typical
ON voltage	14.4 VDC min.
OFF voltage	5.0 VDC max.
ON delay	1 ms max. ✱
OFF delay	1 ms max. ✱
Circuit configuration	
Note: Do not apply voltage in excess of the rated voltage to the input terminal.
✱ The response time is the hardware delay value. The delay set in the PLC Setup (0 to 32 ms, default: 8 ms) must be added to this value. For the CP1W-40EDR/EDT/EDT1, a fixed value of 16 ms must be added.

●Output Specifications
Relay Outputs (CP1W-40EDR/32ER/20EDR1/16ER/8ER)

Item			Specification
Max. switching capacity			2 A, 250 VAC (cosϕ = 1), 2 A, 24 VDC (4 A/common)
Min. switching capacity			5 VDC, 10 mA
Service life of relay (See note.)	Electrical	Resistive load	150,000 operations (24 VDC)
		Inductive load	100,000 operations (240 VAC, cosϕ = 0.4)
	Mechanical		20,000,000 operations
ON delay			15 ms max.
OFF delay			15 ms max.
Circuit configuration			
**Note: 1.** Estimating the Service Life of Relays
The service life of output contacts is as shown in the following diagram.

Switching rate: 1,800 operations/hour
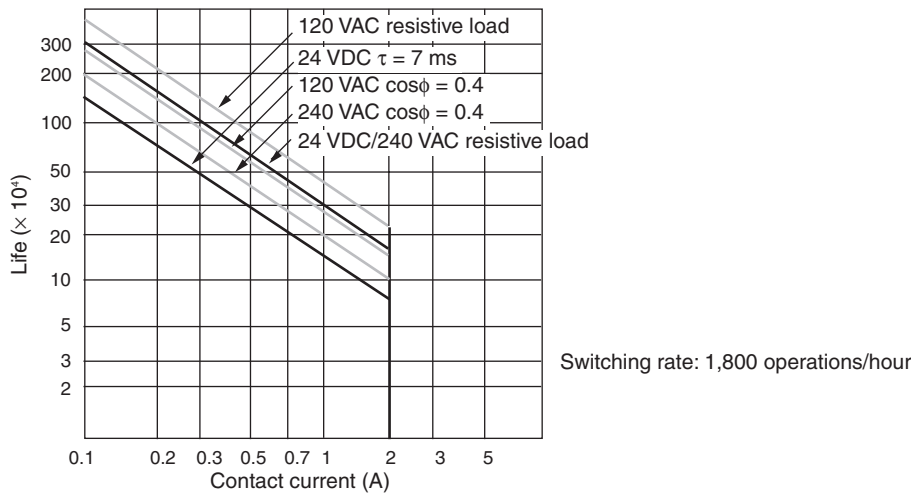

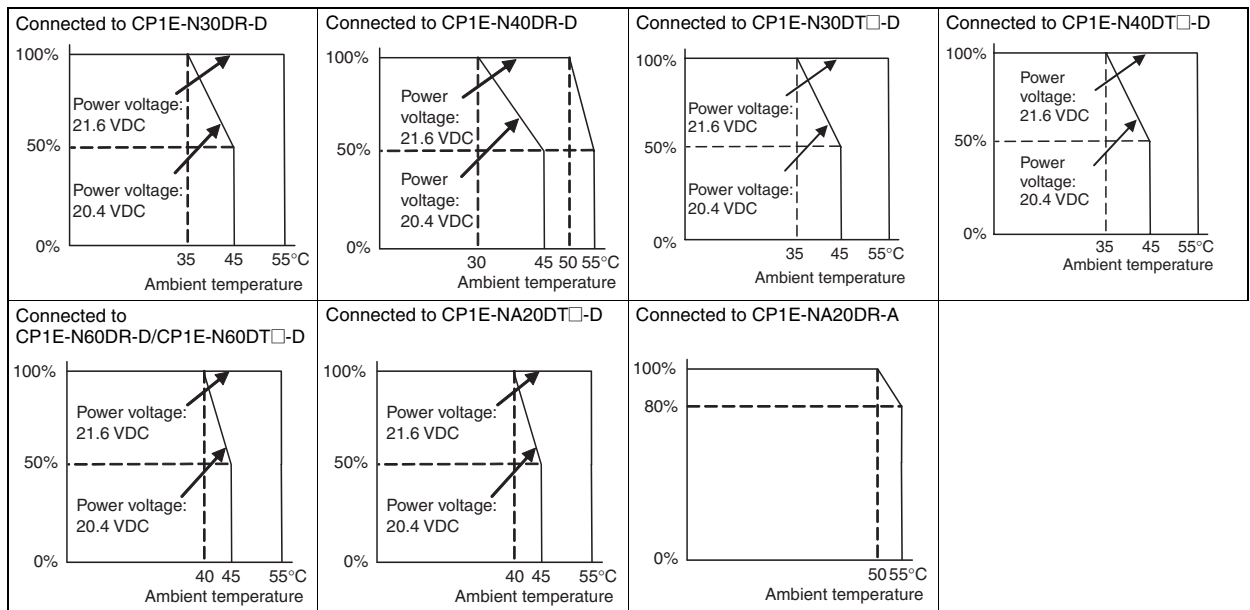

2. Restrictions of CP1W-16ER/32ER
Limit the output load current to satisfy the following derating curve.

3. CP1W-32ER's maximum number of simultaneously ON output points is 24 (75%).
Relation between Number of ON Outputs and Ambient Temperature (CP1W-32ER)

4. According to the ambient temperature, there are restrictions on power supply voltage and output load current for the CPU Units connected with the Expansion I/O Units (CP1W-8ER/16ER/20EDR1/32ER/40EDR). Use the PLC in the range of the power supply voltage and output load current as show below.
The ambient temperature is restricted for the power-supply CPU Units (CP1E-N/NA□□□□-□). Derating curve of the output load current for Expansion I/O Units (CP1W-8ER/16ER/20EDR1/32ER/40EDR).

●Transistor Outputs (Sinking or Sourcing)

Overall accuracy — 25°C	0.3% full scale	0.4% full scale
Overall accuracy — 0 to 55°C	0.6% full scale	0.8% full scale
A/D conversion data	16-bit binary (4-digit hexadecimal) Full scale for −10 to 10 V: F448 to 0BB8 hex Full scale for other ranges: 0000 to 1770 hex	
Averaging function	Supported (Settable for individual inputs via DIP switch)	
Open-circuit detection function	Supported	
Analog Output Section — Number of outputs	1 output (1 word allocated)	
Output signal range	1 to 5 VDC, 0 to 10 VDC, or −10 to 10 VDC,	0 to 20 mA or 4 to 20 mA
Allowable external output load resistance	1 kΩ min.	600 Ω max.
External output impedance	0.5 Ω max.	
Resolution	1/6000 (full scale)	
Overall accuracy — 25°C	0.4% full scale	
Overall accuracy — 0 to 55°C	0.8% full scale	
Set data (D/A conversion)	16-bit binary (4-digit hexadecimal) Full scale for −10 to 10 V: F448 to 0BB8 hex Full scale for other ranges: 0000 to 1770 hex	
Conversion time	2 ms/point (6 ms/all points)	
Isolation method	Photocoupler isolation between analog I/O terminals and internal circuits. No isolation between analog I/O signals.	
Current consumption	5 VDC: 83 mA max., 24 VDC: 110 mA max.	

●Temperature Sensors Units

Item	CP1W-TS001	CP1W-TS002	CP1W-TS101	CP1W-TS102
Temperature sensors	Thermocouples		Platinum resistance thermometer	
	Switchable between K and J, but same type must be used for all inputs.		Switchable between Pt100 and JPt100, but same type must be used for all inputs.	
Number of inputs	2	4	2	4
Allocated input words	2	4	2	4
Accuracy	(The larger of ±0.5% of converted value or ±2°C) ±1 digit max. ✻		(The larger of ±0.5% of converted value or ±1°C) ±1 digit max.	
Conversion time	250 ms for 2 or 4 input points			
Converted temperature data	16-bit binary data (4-digit hexadecimal)			
Isolation	Photocouplers between all temperature input signals			
Current consumption	5 VDC: 40 mA max., 24 VDC: 59 mA max.		5 VDC: 54 mA max., 24 VDC: 73 mA max.	

✻ Accuracy for a K-type sensor at -100°C or less is ±4°C ±1 digit max.

The rotary switch is used to set the temperature range.

Setting		CP1W-TS001/TS002			CP1W-TS101/TS102		
		Input type	Range (°C)	Range (°F)	Input type	Range (°C)	Range (°F)
	0	K	−200 to 1,300	−300 to 2,300	Pt100	−200.0 to 650.0	−300.0 to 1,200.0
	1		0.0 to 500.0	0.0 to 900.0	JPt100	−200.0 to 650.0	−300.0 to 1,200.0
	2	J	−100 to 850	−100 to 1,500	---	Cannot be set.	
	3		0.0 to 400.0	0.0 to 750.0	---		
	4 to F	---	Cannot be set.		---		

●CompoBus/S I/O Link Unit

| Model number	CP1W-SRT21
Master/slave	CompoBus/S Slave
Number of I/O points	8 input points, 8 output points
Number of words allocated in CPU Unit I/O memory	1 input word, 1 output word
Node number setting	Set using the DIP switch (Set before turning on the CPU Unit's power supply.)

External Interfaces

The CP1E CPU Units provide the following external interfaces.
E10/14/20 or N14/20 CPU Units

E-type

Power supply input terminals

Input terminal block
Input indicators
Peripheral USB port
Analog adjusters
Operation indicators
Output terminals

Ground terminal
Input terminals
Output indicators
Output terminal block

N-type

Built-in RS-232C communications status indicator
Built-in RS-232C port
Battery cover
Note: Terminal Block (Fixed)

E30/40, N30/40/60 or NA20 CPU Units

E-type

Power supply input terminals
Input terminals

Input terminal block
Input indicators
Peripheral USB port
Analog adjusters
Operation indicators

External power supply
Output terminals

Ground terminal
Expansion I/O Unit connector
Output indicators
Output terminal block

N-type/NA-type

Built-in RS-232C communications status indicator
Battery cover

Analog input terminal (NA-type only)

Built-in RS-232C port
Serial Option Board slot

Analog output terminals (NA-type only)

Note: Terminal Block (Fixed)

Serial Communications Port for N/NA-type CPU Units

The Serial Communication Port can be used for a CP1E N/NA-type CPU Unit.

CP1E N30/40/60 or NA20 CPU Units

Built-in RS-232C port

CP1W-CIF01 RS-232C Option Board

CP1W-CIF11/12 RS-422A/485 Option Board

CP1W-CIF41 Ethernet Option Board version 2.0 or higher

Optional Serial Communication Board

Model number	Port	Maximum transmission distance	Connection method
CP1W-CIF01	One RS-232C port	15 m	Connector (D-sub, 9 pin female)
CP1W-CIF11	One RS-422A/485 port (not isolated)	50 m	Terminal block (using ferrules)
CP1W-CIF12	One RS-422A/485 port (isolated)	500 m	Terminal block (using ferrules)
CP1W-CIF41	One Ethernet port	100 m	Connector (RJ45, 8 pin modular)

●Specifications

Type		100/10Base-TX (Auto-MDIX)	
Support Software		CX-Programmer version 9.12 or higher	
Transfer	Media access method	CSMA/CD	
	Modulation method	Baseband	
	Transmission paths	Star form	
	Baud rate	100 Mbit/s (100Base-TX)	10 Mbit/s (10Base-TX)
		• Half/full auto-negotiation for each port • Link speed auto-sensing for each port	
	Transmission media	• Unshielded twisted-pair (UDP) cable Categories: 5, 5e • Shielded twisted-pair (STP) cable Categories: 100Ω at 5, 5e	• Unshielded twisted-pair (UDP) cable Categories: 3, 4, 5, 5e • Shielded twisted-pair (STP) cable Categories: 100Ω at 3, 4, 5, 5e
	Transmission Distance	100 m (distance between hub and node)	
	Number of cascade connections	No restrictions if switching hubs are used.	

●FINS Communications Service Specifications

| Number of nodes	254	
Message Length	552 bytes max.	
Date Length	540 bytes max. (except for FINS header 10 byte and Command header 2 byte.)	
Number of buffer	8k byte	
Protocol name	FINS/UDP method	FINS/TCP method
Protocol used	UDP/IP	TCP/IP
	The selection of UDP/IP or TCP/IP is made from the FINS/TCP Tab by the Web browser function.	
Number of connections	---	2
Port number	9600 (default) Can be changed.	9600 (default) Can be changed.
Protection	No	Yes (Specification of client IP addresses when unit is used as a server)

Connecting to Support Software

Operating Environment and System Configuration

The following system is required to operate the CX-Programmer. Make sure your system provides the following conditions and has the necessary components.

Item	Description
Supported computer	IBM PC/AT or equivalent
CD-ROM or DVD-ROM drive	One or more
Supported Operating Systems	Windows 2000 (Service Pack 4 or higher), XP, Vista, or 7 (except 64-bit edition)
CPU	Pentium II 333 MHz or faster
RAM	256 MB min. 512 MB or more recommended
Available hard disk space	600 MB min.
Display	800 x 600 SVGA min.
PLC and connection port	USB port, RS-232C port, RS-422A/485 port or Ethernet port

Connecting Methods

Using commercially available USB cable, connect the CX-Programmer to the peripheral USB port on the CPU Unit.
Host link connection can be made with RS-232C port to connect the Programming Device (CX-Programmer).

CX-Programmer

USB port

A connector

CP1E CPU Unit

Commercially available
USB cable

B connector

Peripheral USB port
(Conforming to USB 2.0, B connector)

Connecting Cable

Use the following cable to connect the CP1E CPU Unit to the computer running the Support Software.

USB port

Port at Unit	Port at computer	Network type (communications mode)	Model numbers	Length
Peripheral USB port (Conforming to USB 2.0, B connector)	USB port	USB 2.0 (or 1.1)	Commercially available USB cable (A connector - B connector)	Less than 5 m

RS-232C Port for N/NA-type CPU Units

Port at Unit	Port at computer	Communications mode	Connecting Cable		
			Model	Length	Remarks
RS-232C Port or CP1W-CIF01 (Add this to the option board slot.)	RS-232C port ✻	Host Link (SYSWAY)	XW2Z-200S-CV	2m	With anti-static connectors
			XW2Z-500S-CV	5m	With anti-static connectors
			XW2Z-200S-V	2m	---
			XW2Z-500S-V	5m	---

Note: Connectable with CX-Programmer Ver.9.1 or higher only.
✻ Use the USB-Serial Conversion Cable CS1W-CIF31 together to connect a PLC to a personal computer's USB port.

OMRON

OMRON

Terms and Conditions of Sale

1. **Offer; Acceptance.** These terms and conditions (these "Terms") are deemed part of all quotes, agreements, purchase orders, acknowledgments, price lists, catalogs, manuals, brochures and other documents, whether electronic or in writing, relating to the sale of products or services (collectively, the "Products") by Omron Electronics LLC and its subsidiary companies ("Omron"). Omron objects to any terms or conditions proposed in Buyer's purchase order or other documents which are inconsistent with, or in addition to, these Terms.
2. **Prices; Payment Terms.** All prices stated are current, subject to change without notice by Omron. Omron reserves the right to increase or decrease prices on any unshipped portions of outstanding orders. Payments for Products are due net 30 days unless otherwise stated in the invoice.
3. **Discounts.** Cash discounts, if any, will apply only on the net amount of invoices sent to Buyer after deducting transportation charges, taxes and duties, and will be allowed only if (i) the invoice is paid according to Omron's payment terms and (ii) Buyer has no past due amounts.
4. **Interest.** Omron, at its option, may charge Buyer 1-1/2% interest per month or the maximum legal rate, whichever is less, on any balance not paid within the stated terms.
5. **Orders.** Omron will accept no order less than $200 net billing.
6. **Governmental Approvals.** Buyer shall be responsible for, and shall bear all costs involved in, obtaining any government approvals required for the importation or sale of the Products.
7. **Taxes.** All taxes, duties and other governmental charges (other than general real property and income taxes), including any interest or penalties thereon, imposed directly or indirectly on Omron or required to be collected directly or indirectly by Omron for the manufacture, production, sale, delivery, importation, consumption or use of the Products sold hereunder (including customs duties and sales, excise, use, turnover and license taxes) shall be charged to and remitted by Buyer to Omron.
8. **Financial.** If the financial position of Buyer at any time becomes unsatisfactory to Omron, Omron reserves the right to stop shipments or require satisfactory security or payment in advance. If Buyer fails to make payment or otherwise comply with these Terms or any related agreement, Omron may (without liability and in addition to other remedies) cancel any unshipped portion of Products sold hereunder and stop any Products in transit until Buyer pays all amounts, including amounts payable hereunder, whether or not then due, which are owing to it by Buyer. Buyer shall in any event remain liable for all unpaid accounts.
9. **Cancellation; Etc.** Orders are not subject to rescheduling or cancellation unless Buyer indemnifies Omron against all related costs or expenses.
10. **Force Majeure.** Omron shall not be liable for any delay or failure in delivery resulting from causes beyond its control, including earthquakes, fires, floods, strikes or other labor disputes, shortage of labor or materials, accidents to machinery, acts of sabotage, riots, delay in or lack of transportation or the requirements of any government authority.
11. **Shipping; Delivery.** Unless otherwise expressly agreed in writing by Omron:
    a. Shipments shall be by a carrier selected by Omron; Omron will not drop ship except in "break down" situations.
    b. Such carrier shall act as the agent of Buyer and delivery to such carrier shall constitute delivery to Buyer;
    c. All sales and shipments of Products shall be FOB shipping point (unless otherwise stated in writing by Omron), at which point title and risk of loss shall pass from Omron to Buyer; provided that Omron shall retain a security interest in the Products until the full purchase price is paid;
    d. Delivery and shipping dates are estimates only; and
    e. Omron will package Products as it deems proper for protection against normal handling and extra charges apply to special conditions.
12. **Claims.** Any claim by Buyer against Omron for shortage or damage to the Products occurring before delivery to the carrier must be presented in writing to Omron within 30 days of receipt of shipment and include the original transportation bill signed by the carrier noting that the carrier received the Products from Omron in the condition claimed.
13. **Warranties.** (a) *Exclusive Warranty.* Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied. (b) *Limitations.* OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABIL-ITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) *Buyer Remedy.* Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty. See http://www.omron247.com or contact your Omron representative for published information.
14. **Limitation on Liability; Etc.** OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY. Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.
15. **Indemnities.** Buyer shall indemnify and hold harmless Omron Companies and their employees from and against all liabilities, losses, claims, costs and expenses (including attorney's fees and expenses) related to any claim, investigation, litigation or proceeding (whether or not Omron is a party) which arises or is alleged to arise from Buyer's acts or omissions under these Terms or in any way with respect to the Products. Without limiting the foregoing, Buyer (at its own expense) shall indemnify and hold harmless Omron and defend or settle any action brought against such Companies to the extent based on a claim that any Product made to Buyer specifications infringed intellectual property rights of another party.
16. **Property; Confidentiality.** Any intellectual property in the Products is the exclusive property of Omron Companies and Buyer shall not attempt to duplicate it in any way without the written permission of Omron. Notwithstanding any charges to Buyer for engineering or tooling, all engineering and tooling shall remain the exclusive property of Omron. All information and materials supplied by Omron to Buyer relating to the Products are confidential and proprietary, and Buyer shall limit distribution thereof to its trusted employees and strictly prevent disclosure to any third party.
17. **Export Controls.** Buyer shall comply with all applicable laws, regulations and licenses regarding (i) export of products or information; (iii) sale of products to "forbidden" or other proscribed persons; and (ii) disclosure to non-citizens of regulated technology or information.
18. **Miscellaneous.** (a) *Waiver.* No failure or delay by Omron in exercising any right and no course of dealing between Buyer and Omron shall operate as a waiver of rights by Omron. (b) *Assignment.* Buyer may not assign its rights hereunder without Omron's written consent. (c) *Law.* These Terms are governed by the law of the jurisdiction of the home office of the Omron company from which Buyer is purchasing the Products (without regard to conflict of law principles). (d) *Amendment.* These Terms constitute the entire agreement between Buyer and Omron relating to the Products, and no provision may be changed or waived unless in writing signed by the parties. (e) *Severability.* If any provision hereof is rendered ineffective or invalid, such provision shall not invalidate any other provision. (f) *Setoff.* Buyer shall have no right to set off any amounts against the amount owing in respect of this invoice. (g) *Definitions.* As used herein, "including" means "including without limitation"; and "Omron Companies" (or similar words) mean Omron Corporation and any direct or indirect subsidiary or affiliate thereof.

Certain Precautions on Specifications and Use

1. **Suitability of Use.** Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases but the following is a non-exhaustive list of applications for which particular attention must be given:
   (i) Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.
   (ii) Use in consumer products or any use in significant quantities.
   (iii) Energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
   (iv) Systems, machines and equipment that could present a risk to life or property. Please know and observe all prohibitions of use applicable to this Product.
   NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON'S PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.
2. **Programmable Products.** Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.
3. **Performance Data.** Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.
4. **Change in Specifications.** Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.
5. **Errors and Omissions.** Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
