| TESOL Quarterly |            |                 |  |                           |  |  |
|-----------------|------------|-----------------|--|---------------------------|--|--|
| NO              | Authors    | Conjunction     | Clause   | Process<br>Types          |  |  |
|                 | Fizsimmons |                 | Language Ideology Change Over Time: Lessons for Language Policy in the U.S. State of Arizona and Beyond  |                           |  |  |
| tq-1.1          |            | BACK-<br>GROUND | In the U.S. state of Arizona, language minority students who are English learners attend schools governed by a restrictive medium of instruction (MOI) language policy (LP).                                     | Material                  |  |  |
| tq-1.2          |            |                 | Educators and educational researchers widely agree that effective reforms of this policy are urgently needed (e.g., Arias & Faltis, 2012; Lawton, 2012; Lillie, 2016).   | Verbal                    |  |  |
| tq-1.3          |            | that            | effective reforms of this policy are urgently needed (e.g., Arias & Faltis, 2012; Lawton, 2012; Lillie, 2016).   | Relational<br>Possessive  |  |  |
| tq-1.4          |            | Furthermore,    | several research studies (e.g., D. C. Johnson, 2009; Stritikus, 2003) have shown that the language ideologies held by policy-influential individuals affect the development and implementation of such policies. | Relational<br>Identifying |  |  |
| tq-1.5          |            | that            | the language ideologies held by policy-influential individuals affect the development and implementation of such policies.   | Material                  |  |  |

| tq-1.6  |                 | Thus,  | Arizona MOI reforms need to be aligned with language ideologies of key stakeholders.  | Relational<br>Attributive |  |
|---------|-----------------|--|---|---------------------------|--|
| tq-1.7  |                 | METHOD   | To shed light on MOI reform processes in Arizona and internationally, this study resurveyed politically active voters, administrators, and teachers from Fitzsimmons-Doolan (2014), to identify any shifts in their language ideologies between 2010 and 2016, to ascertain how these stakeholders perceive Arizona's educational LP, and to better understand how they relate their language ideologies to their policy perceptions. | Material                  |  |
| tq-1.8  |                 | PURPOSE  | To shed light on MOI reform processes in Arizona and internationally,   | Mental                    |  |
| tq-1.9  |                 |  | to identify any shifts in their language ideologies between 2010 and 2016,  | Mental                    |  |
| tq-1.10 |                 | and  | to ascertain how these stakeholders perceive Arizona's educational LP   | Mental                    |  |
| tq-1.11 |                 | and  | to better understand how they relate their language ideologies to their policy perceptions.   | Mental                    |  |
| tq-1.12 |                 | RESULT   | Results indicate some limited ideological change, key themes of equity, pro-assimilation, and anti-segregation across policy perceptions, and evidence supporting an LP model that moves toward stasis among LP components.   | Relational<br>Identifying |  |
| tq-1.13 |                 | DISCUSSION   | The results suggest that efforts to facilitate ideological change grounded in stakeholder experience might be considered in contexts undergoing LP reform.  | Relational<br>Identifying |  |
| tq-1.14 |                 | that   | efforts to facilitate ideological change grounded in stakeholder experience might be considered in contexts undergoing LP reform.   | Mental                    |  |
|         | Eckstein et al. | ein et al. Comparing L1 and L2 Texts and Writers in First-Year Composition |   |                           |  |
| tq-2.1  |                 | BACK-<br>GROUND  | Scholars have at various points discussed the needs of second language (L2) writers enrolled in "mainstream" composition courses where they are mixed with native (L1) English speakers.  | Verbal                    |  |
| tq-2.2  |                 |  | Other researchers have investigated the experiences of L2 writers in mainstream classes and the perceptions of their instructors about their abilities and needs.   | Material                  |  |
| tq-2.3  |                 | however,   | Little research,, has directly compared L1 and L2 students (mostly Generation 1.5) taking composition classes together.   | Material                  |  |
| tq-2.4  |                 | METHOD   | For this article, the researchers collected writing samples from 56 L1 and 74 L2 students enrolled in a university (mainstream) first-year composition course.  | Material                  |  |
| tq-2.5  |                 |  | Using a mixed-methods design, they analyzed the texts for language error counts as well as measures of lexical and syntactic complexity;  | Material                  |  |
| tq-2.6  |                 |  | Using a mixed-methods design, they analyzed the texts for language error counts as well as measures of lexical and syntactic complexity;  | Material                  |  |
|         |                 | PURPOSE  | Using a mixed-methods design, they analyzed the texts for language error counts as well as measures of lexical and syntactic complexity;  |                           |  |
| tq-2.7  |                 |  | they juxtaposed these with insights from survey responses of both groups of writers and in-depth interviews.  | Material                  |  |
| tq-2.8  |                 |  | Using a mixed-methods design, they conclude that, although L1 and L2 students have much in common, the L2 students had observed and (self-) perceived language needs that were significantly different from those of the L1 students.   | Material                  |  |

| tq-2.9  |        | RESULT that     | Using a mixed-methods design, they conclude that, although L1 and L2 students have much in common, the L2 students had observed and (self-) perceived language needs that were significantly different from those of the L1 students.   | Verbal                    |
|---------|--------|-----------------|---|---------------------------|
| tq-2.10 |        | that,           | although L1 and L2 students have much in common, the L2 students (1) had observed (2) and self-perceived language needs that were significantly different from those of the L1 students.  | Mental                    |
| tq-2.11 |        | and             | although L1 and L2 students have much in common, the L2 students (1) had observed (2) and self-perceived language needs that were significantly different from those of the L1 students.  | Mental                    |
| tq-2.12 |        | although        | L1 and L2 students have much in common,   | Relational<br>Possessive  |
| tq-2.13 |        |                 | These included differences in linguistic accuracy, lexical diversity, and language-related anxiety.   | Relational<br>Possessive  |
| tq-2.14 |        | DISCUSSION      | Implications for pedagogy include recommendations for teaching L2 writers to self-edit for common patterns of errors and sensitize students to the value of nuanced and purposeful lexical variety in their writing.  | Relational<br>Possessive  |
|         | Kelly  |                 | Preservice Teachers' Developing Conceptions of Teaching English Learners  |                           |
|         |        | BACK-<br>GROUND | NO BACKGROUND   |                           |
| tq-3.1  |        | METHOD          | In this study, 12 preservice teachers in a community college English as a second language (ESL) K–12 teacher education program (1) drew picture and (2) wrote of teachers teaching English language learners (ELLs) at the beginning and end of an ESL methods course.            | Material                  |
| tq-3.2  |        | and             | [In this study, 12 preservice teachers in a community college English as a second language (ESL) K–12 teacher education program] (1) drew picture (2) wrote descriptions of teachers teaching English language learners (ELLs) at the beginning and end of an ESL methods course. | Material                  |
| tq-3.3  |        |                 | Using content analysis, the researcher analyzed the drawings and descriptions with respect to the role of the teacher, the role of the students, the teaching strategies shown, the instructional content, and how the drawings changed over the semester.                        | Material                  |
| tq-3.4  |        |                 | Using content analysis, the researcher analyzed the drawings and descriptions with respect to the role of the teacher, the role of the students, the teaching strategies shown, the instructional content, and how the drawings changed over the semester.                        | Material                  |
| tq-3.5  |        | RESULT          | Preservice teachers depicted more and varied teaching strategies in end-of-course drawings,   | Material                  |
| tq-3.6  |        | but             | overall findings showed that preservice teachers viewed teaching ELLs as a teacher implementing direct instruction in basic literacy to passive students at both the beginning and end of the course.   | Relational<br>Identifying |
| tq-3.7  |        | that            | preservice teachers viewed teaching ELLs as a teacher implementing direct instruction in basic literacy to passive students at both the beginning and end of the course.  | Mental                    |
| tq-3.8  |        |                 | The article discusses the importance of impacting preservice teacher beliefs through teacher education.   | Verbal                    |
| tq-3.9  |        | and             | [This article] explores the benefits and limits of using drawings for this purpose.   | Material                  |
|         | Kurzer |                 | Dynamic Written Corrective Feedback in Developmental Multilingual Writing Classes   |                           |

|        |            | BACK-<br>GROUND | NO BACKGROUND   |                           |
|--------|------------|-----------------|---|---------------------------|
| tq-4.1 |            | PURPOSE         | This study investigated the role of dynamic written corrective feedback (DWCF; Evans, Hartshorn, McCollum, & Wolfersberger, 2010; Hartshorn & Evans, 2015; Hartshorn et al., 2010), a mode of providing specific, targeted, and individualized grammar feedback in developmental English as a second language (ESL) writing classes (pre–first year composition) at a large western U.S. research university.   | Material                  |
|        |            | METHOD          | Via a quasi-experimental design investigating DWCF at three different levels of developmental ESL writing classes across three terms with 325 student participants, results of this study suggest that multilingual students become better at self-editing and have more accurate timed writing paragraphs after taking classes that supplement grammar instruction using DWCF than those who take classes with only traditional grammar instruction. |                           |
| tq-4.2 |            | RESULT          | Via a quasi-experimental design investigating DWCF at three different levels of developmental ESL writing classes across three terms with 325 student participants, results of this study suggest that multilingual students become better at self-editing and have more accurate timed writing paragraphs after taking classes that supplement grammar instruction using DWCF than those who take classes with only traditional grammar instruction. | Relational<br>Identifying |
| tq-4.3 |            | that            | multilingual students (1) become better at self-editing and (2) have more accurate timed writing paragraphs [after taking classes that supplement grammar instruction using DWCF than those who take classes with only traditional grammar instruction.]  | Relational<br>Attributive |
| tq-4.4 |            | and             | [ multilingual students] (1) become better at self-editing (2) have more accurate timed writing paragraphs after taking classes that supplement grammar instruction using DWCF than those who take classes with only traditional grammar instruction.   | Relational<br>Possessive  |
| tq-4.5 |            | METHOD          | Specific error categories were investigated (global, local, and mechanical, per Bates, Lane, & Lange, 1993), with largely significant results across all error types at each language level, indicating that DWCF may be an effective pedagogical intervention to improve linguistic accuracy.  | Material                  |
|        |            | RESULT          | Specific error categories were investigated (global, local, and mechanical, per Bates, Lane, & Lange, 1993), with largely significant results across all error types at each language level,  |                           |
| tq-4.6 |            | DISCUSSION      | indicating that DWCF may be an effective pedagogical intervention to improve linguistic accuracy.   | Relational<br>Identifying |
| tq-4.7 |            | that            | DWCF may be an effective pedagogical intervention to improve linguistic accuracy.   | Relational<br>Attributive |
|        | Lee et al. |                 | Flipped Learning in the English as a Foreign Language Classroom: Outcomes and Perceptions   |                           |
| tq-5.1 |            | Although        | many educators have recently discussed the positive effects of flipped learning, there is little empirical evidence about whether this approach can actually promote students' English learning.  | Verbal                    |
| tq-5.2 |            | BACK-<br>GROUND | Although many educators have recently discussed the positive effects of flipped learning, there is little empirical evidence about whether this approach can actually promote students' English learning.   | Existential               |
| tq-5.3 |            | METHOD          | This study was undertaken in four sections of the same College English 1 (E1) course over two consecutive semesters at a South Korean university.   | Material                  |
| tq-5.4 |            |                 | A total of 79 students enrolled in the E1 course participated in the study.   | Material                  |
| tq-5.5 |            |                 | Of the participants, 39 learned English using a communicative language teaching approach,   | Material                  |

| tq-5.6  |                 | Of the participants, 39 learned English using a communicative language teaching approach,  | Material                  |
|---------|-----------------|--|---------------------------|
| tq-5.7  | whereas         | 40 studied English in a flipped learning manner.   | Material                  |
| tq-5.8  |                 | Data were gathered from the students' achievements in three major tasks, their responses to three surveys, and the instructor's notes on the students' engagement in the process of their English learning.  | Material                  |
| tq-5.9  | RESULT          | Findings demonstrate that the students in the flipped classroom achieved higher average scores in their final three tasks than those in the non-flipped classroom, but only the final examination mean score indicated statistical significance.   | Relational<br>Identifying |
| q-5.10  | that            | the students in the flipped classroom achieved higher average scores in their final three tasks than those in the non-flipped classroom,   | Material                  |
| tq-5.11 | but             | only the final examination mean score indicated statistical significance.  | Relational<br>Identifying |
| tq-5.12 | However,        | surveys indicated that most students in this study seemed to enjoy learning English in a flipped learning environment.   | Relational<br>Identifying |
| tq-5.13 | that            | most students in this study seemed to enjoy learning English in a flipped learning environment.  | mental                    |
| tq-5.14 |                 | Also, the instructor found the students in the flipped classroom to be more engaged in the learning process than those in the non-flipped classroom.   | mental                    |
| tq-5.15 |                 | the students in the flipped classroom to be more engaged in the learning process than those in the non-flipped classroom.  | Relational<br>Attributive |
| tq-5.16 | DISCUSSION      | Pedagogical implications for effective English teaching are discussed.   | Verbal                    |
|         | Shahri          | Constructing a Voice in English as a Foreign Language: Identity and Engagement   |                           |
| tq-6.1  | PURPOSE         | Situated in an English as a foreign language (EFL) context, this study navigates the intersection of language learner identity and foreign language engagement.  | Material                  |
| tq-6.2  | BACK-<br>GROUND | Specifically, drawing on the concept of voice (Canagarajah, 2013; Johnstone, 1996; Kramsch, 2003), Bakhtin's (1981) theory of language, and the notion of investment (Darvin & Norton, 2015; Norton Peirce, 1995), it presents two case studies of voice construction by EFL learners in Iran. | Material                  |
| tq-6.3  | PURPOSE         | Specifically, drawing on the concept of voice (Canagarajah, 2013; Johnstone, 1996; Kramsch, 2003), Bakhtin's (1981) theory of language, and the notion of investment (Darvin & Norton, 2015; Norton Peirce, 1995), it presents two case studies of voice construction by EFL learners in Iran. | Relational<br>Identifying |
|         | METHOD          | Through classroom observations, biographical and sociolinguistic interviews, and learner metalinguistic commentary, the study reveals how the two participants invest in two different voices that index their efforts toward the construction of a second language—mediated identity.         |                           |
| tq-6.4  | RESULT          | Through classroom observations, biographical and sociolinguistic interviews, and learner metalinguistic commentary, the study reveals how the two participants invest in two different voices that index their efforts toward the construction of a second language—mediated identity.         | Relational<br>Identifying |
| tq-6.5  |                 | Through classroom observations, biographical and sociolinguistic interviews, and learner metalinguistic commentary, the study reveals how the two participants invest in two different voices that index their efforts toward the construction of a second language—mediated identity.         | Material                  |

| tq-6.6  |              |                 | The two learners are shown to gravitate toward informal and formal English words and use them in their speech in ways that are illustrative of how they envision their engagement with English both in the present and in the future.   | Relational<br>Identifying    |
|---------|--------------|-----------------|---|------------------------------|
| tq-6.7  |              |                 | The two learners to gravitate toward informal and formal English words  | Material                     |
| tq-6.8  |              | and             | [The two learners to] use them in their speech in ways that are illustrative of how they envision their engagement with English both in the present and in the future.  | Material                     |
| tq-6.9  |              | DISCUSSION      | The pedagogical implications of the study are then discussed.   | Verbal                       |
|         | Gallagher    |                 | University Faculty Beliefs About Emergent Multilinguals and Linguistically Responsive Instruction   |                              |
| tq-7.1  |              | BACK-<br>GROUND | Internationalization trends worldwide have brought more multilingual students into English-medium university classrooms in the United States and elsewhere.   | Material                     |
| tq-7.2  |              |                 | Faculty across the disciplines increasingly have the dual challenge of developing both content and advanced academic language.  | Relational<br>Possessive     |
| tq-7.3  |              |                 | Ample precedent in P–12 education suggests developing instructors' knowledge of (a) students as language learners, (b) instructional techniques grounded in second language acquisition theory, and (c) contextual factors necessary for helping instructors implement linguistically responsive instruction (LRI). | Verbal                       |
| tq-7.4  |              |                 | developing instructors' knowledge of (a) students as language learners, (b) instructional techniques grounded in second language acquisition theory, and (c) contextual factors necessary for helping instructors implement linguistically responsive instruction (LRI).  | Material                     |
| tq-7.5  |              | PURPOSE         | This study probes the extent to which prior work transfers to the tertiary setting,   | Material                     |
| tq-7.6  |              |                 | focusing on participating faculty members' beliefs about multilingual students, LRI, and context.   | Relational<br>Circumstantial |
| tq-7.7  |              | METHOD          | The authors collected survey data from 197 faculty at a mid-size comprehensive university in the Midwestern United States   | Material                     |
| tq-7.8  |              | and             | [The authors] analyzed written comments provided by participants.   | Material                     |
| tq-7.9  |              | RESULT          | They found that, on the whole, faculty participants displayed deficit views regarding students' linguistic and academic abilities and questioned the appropriateness and feasibility of several of the LRI techniques.  | Mental                       |
| tq-7.10 |              | that            | faculty participants displayed deficit views regarding students' linguistic and academic abilities  | Verbal                       |
| tq-7.11 |              | and             | [faculty participants] questioned the appropriateness and feasibility of several of the LRI techniques.   | Verbal                       |
| tq-7.12 |              |                 | Many rejected the notion that language instruction was within the scope of their responsibilities   | Verbal                       |

|        |                 | Language Ideology Change Over Time: Lessons for Language Policy in the U.S. State of Arizona and Be  | yond                      |                                       |  |  |
| tq-1.1 | BACK-<br>GROUND | In the U.S. state of Arizona, language minority students who are English learners attend schools governed by a restrictive medium of instruction (MOI) language policy (LP).                                     | Material                  | Current Practice                      |  |  |
| tq-1.2 |                 | Educators and educational researchers widely agree that effective reforms of this policy are urgently needed (e.g., Arias & Faltis, 2012; Lawton, 2012; Lillie, 2016).   | Verbal                    | Current Research<br>Topic of Interest |  |  |
| tq-1.3 | that            | effective reforms of this policy are urgently needed (e.g., Arias & Faltis, 2012; Lawton, 2012; Lillie, 2016).   | Relational<br>Possessive  | Current Research<br>Topic of Interest |  |  |
| tq-1.4 | Furthermore,    | several research studies (e.g., D. C. Johnson, 2009; Stritikus, 2003) have shown that the language ideologies held by policy-influential individuals affect the development and implementation of such policies. | Relational<br>Identifying | Conceptual<br>Background              |  |  |
| tq-1.5 | that            | the language ideologies held by policy-influential individuals affect the development and implementation of such policies.   | Material                  | Conceptual<br>Background              |  |  |
| tq-1.6 | Thus,           | Arizona MOI reforms need to be aligned with language ideologies of key stakeholders.   | Relational<br>Attributive | Conclusion                            |  |  |

|        |                 | Comparing L1 and L2 Texts and Writers in First-Year Composition   |                          |                                       |
|--------|-----------------|---|--------------------------|---------------------------------------|
| tq-2.1 | BACK-<br>GROUND | Scholars have at various points discussed the needs of second language (L2) writers enrolled in "mainstream" composition courses where they are mixed with native (L1) English speakers.  | Verbal                   | Current Research Topic of Interest    |

#### **BIOGRAFI PENULIS**

**FRANSISCA NIRMALA KALISTIYANI.** Penulis skripsi ini akrab disapa dengan sebutan Chika. Ia lahir di Bogor pada tanggal 15 Maret 1997. Ia adalah anak terakhir dari tiga bersaudara. Penulis tinggal di Perumahan Cileungsi Indah, Jl. Kenanga 3, Blok A84. Ia berkebangsaan Indonesia dan beragama Katholik.

Penulis bersekolah di SD Negeri Rawa Endah di Cileungsi (Kab. Bogor) selama enam tahun. Kemudian pada tahun 2009, penulis melanjutkan sekolah menengah di SMP Semen Cibinong di Klapanunggal. Selepas lulus Sekolah Menengah Pertama, ia melanjutkan sekolah di SMA Negeri 1 Cileungsi pada tahun 2012 sampai dengan tahun 2015. Pada tahun yang sama, penulis melanjutkan pendidikan di Universitas Negeri Jakarta dan menyelesaikan studinya selama empat setengah tahun. Pada bulan Februari 2020, penulis berhasil menyelesaikan studinya dan menghasilkan penelitian yang berjudul *The Background of Study of Abstracts of Research Articles in TESOL Quarterly and TEFLIN Journals: A Transitivity Analysis*.
