Tujuan dari penelitian ini adalah untuk mengetahui sejauh mana pemahaman siswa kelas 11 terhadap teks eksposisi melalui level yang ada pada rubrik Blake Education. Tabel analisis yang dikembangkan oleh Blake Education (1998) digunakan untuk proses analisis teks esai. Dari ke-empat indikator inti yang di teliti, hasil penelitian ini menunjukkan bahwa (1) rata-rata siswa sudah berada di level 2, yang dapat dikategorikan paham mengenai teks eksposisi (2) meskipun rata-rata baik di IPA dan IPS berada di level 2, data menunjukkan bahwa siswa IPA jauh lebih memahami teks eksposisi daripada siswa IPS. Katarina Kriheni Wijayanti. 2020. Students' Performance in Writing English Exposition Text of the Eleventh Graders of SMAN 13 Jakarta. A Thesis, English Education Study Program, Faculty Languages and Arts, Universitas Negeri Jakarta, Februari 2020.

This analysis includes the understanding of eleventh graders students with the exposition text at SMAN 13 Jakarta. The purpose of this study was to find out to what extent the comprehension of eleventh graders of students of exposition text through the levels in the Blake Education rubric. The analysis table developed by Blake Education (1998) is used for the essay text analysis process. From the four main indicators studied, the results of this study indicate that (1) the average student is already at level 2, which can be categorized as understanding of the exposition text (2) although the average in both the Natural Sciences Program and Social Sciences Program is at level 2, the data shows that the students of Natural Science Program more understand with the exposition text rather than the students of Social Science Program. This study also aims to provide evidence in previous studies (*Nurjanah, 2018*) regarding the difficulties of students in writing exposition texts. This research shows that the ability of students to write exposition texts is in the middle or average stages.
