

ABSTRACT

AHMAD JAHID SAJID. **The Correlation Self Management With Academic Procrastination of Active Educational Biology Students Organize.**

Under supervised by RUSDI, MIEKE MIARSYAH

Undergraduate Thesis. Jakarta: Biology Education Study Program, Faculty of Mathematics and Natural Sciences. State University of Jakarta. 2018.

The Activity of Student in organizing on one side will be useful but on the other hand can neglect the student. The negligence that is often done by students is the behavior of delaying work (Procrastination). Sometimes students prefer the organizational tasks rather than their college assignments. Therefore, good self-management is required so that lecture and organizational tasks can be completed in a timely manner. This study was aims to determine the relationship of management with student academic procrastination, held at the State University of Jakarta. The method used was descriptive method. Sampling was done by purposive sampling and 115 students were obtained. The data were collected using management instruments and academic procrastination instruments and analyzed by normality and homogeneity test. The result of normality test using Kolmogorov-Smirnov test ($\alpha = 0,05$) showed normal distributed data and Levene test for homogeneity test at $\alpha = 0,05$ showed homogeneous distributed data. Regression model obtained is $\hat{Y} = 155,928 - 0,444X$ and current coefficient obtained was 0,504 with $F = 0,884$ ($p > 0,05$) which mean linear data and significant.
