

ABSTRACT

Endah FITRI ASEPIYAH. **Procedures Developed By Teachers of Physical Education Syllabus Sports and Health Class VII Matraman In middle school district, East Jakarta** (2010). Thesis. Jakarta: Faculty of Education, Department of Educational Technology, State University of Jakarta, 2010.

This study aims to describe how the procedures developed by the syllabus of physical education teachers and sports in junior high health class VII Matraman East Jakarta District.

This research was conducted in 97 junior high schools, junior Nurul Iman, a junior Sunan Giri Matraman in East Jakarta District. Respondents were teachers of physical education and health gym class VII, the methods used in this research is descriptive.

The data obtained were analyzed by using interviews and the research sheet. After the analysis of the nine components of the procedure was developed syllabus in general have not seen all the teachers to run and write the syllabus development procedures on the subjects of physical education sport and health. Thus although the procedures developed to enhance the syllabus by teachers in the future, this research suggests that the parties continuously schools providing information on the syllabus with socialization in the form of seminars or workshops that discuss the development of the syllabus to the relevant parties such as teachers and committee school.
