

## Abstract

AJENG WIDYANINGRUM "The Impact of Outdoor Games Activities" to the leadership attitude of 11<sup>th</sup> Physics Grade student in SMA Negeri 2 , Tambun Selatan Bekasi. Thesis : Jakarta , The Study of Sport Program Sport and Recreation Concentrate , Faculty of Sport Study.

The purpose of this thesis' research is to know the impact of Outdoor Games Activities to the leadership attitude of 11<sup>th</sup> Physics Grade student in SMA Negeri 2 Tambun Selatan, Bekasi.

The research has been done in the field of SMA Negeri 2 Tambun Selatan Kabupaten Bekasi on 2<sup>nd</sup> to 14<sup>th</sup> May 2016. By using pre-experiment method with "One Group Pretest-Posttest Design". The amount of sample is 30 people.

The research instrument which have been used is leadership attitude. The use of Data Analysis technical is t-test by counting the value of  $t$  – in contrast to  $t$ -table on freedom degree  $n-1$  and on significant scale of 0.05.

The result of this research stated that the outdoor activities effectively and could increase social attitude the student of 11<sup>th</sup> grade (physics) in SMA Negeri 2 Tambun Selatan Bekasi. It proved by the pre- test and the last test of analysis data. The analysis of the student leadership attitude by using t-test. The result of analysis data amount is  $t$ -value 9.5. Then the next test on trust scale  $\alpha = 0.05$  and freedom degrees  $n-1 = 30-1=29$  the result is 2.045 so that the value of  $t^{\text{count}} > t$  value or  $9.5 > 2.045$

The last conclusion from this research is *outdoor games activities* could grow the leadership attitude of 11<sup>th</sup> grade 11<sup>th</sup> Physics Grade student in SMA Negeri 2 Tambun Selatan, Bekasi.
